NEW QUESTION 73

A Vault Administrator wants to change the PSM Server ID to comply with a naming standard. What is the process for changing the PSM Server ID?

* First, logon to the PrivateArk Client as Administrator and open the PVWAConfig safe. Retrieve and edit the PVConfiguration.xml file. Search for the PSMServer Name and update the ID of the server you want to rename. Save the file and copy back to the PWAConfig safe. Restart the “CyberArk Privileged Session Manager” service on the PSM server.
* Login to the PVWA, then change the PSMServer ID in Administration, System Configuration, Options, Privileged Session Management, Configured PSM Servers. Run an IISRESET on all PVWA servers.
* First, login to the PVWA, browse to Administration, System Configuration, Options, Privileged Session Management, Configured PSM Servers and select the PSM Server you need to change from the list of servers. In the properties pane, set the value of the ID property to the new Server ID, click Apply and OK.

Next, edit the basic_psm.ini file located on the PSM server in the PSM root directory and update the PSMServerID parameter with the new Server ID, save the file and restart the “CyberArk Privileged Session Manager” service on the PSM server.
* Options A and B above is the correct procedure.
