

Pegasystems PEGAPCSSA86V1 Cert Guide PDF 100% Cover Real Exam Questions [Q96-Q117]

Pegasystems PEGAPCSSA86V1 Cert Guide PDF 100% Cover Real Exam Questions
Pass PEGAPCSSA86V1 Exam - Real Questions and Answers

QUESTION 96

You want to create a new minor version of an application ruleset to add a new feature to your application. The new feature will be made available to users in a phased rollout.

How do you update the application to add the new ruleset version?

- * Lock and roll the existing ruleset, and update the existing application version.
- * Lock and roll the existing ruleset, and create a new application version.
- * Create a new application version and add the new ruleset version as a production ruleset.
- * Create a branch ruleset and a new application, and add the branch ruleset to the application.

QUESTION 97

An application contains a flow action with an Apply to: class of TRB-HRApps-Work-Feedback in a locked ruleset. When updating

the application, you save the existing flow action into a new minor version of the ruleset this time applied to TRB-HRApps-Work so it can be used by more than one case type.

How do you prevent the application from using the rule in TRB-HRApps-Work-Feedback?

- * Save an additional new version of the flow action applied to TRB-HRApps-Work-Feedback and set the availability to **Blocked**;
- * Save an additional new version of the flow action applied to TRB-HRApps-Work-Feedback and set the availability to **Withdrawn**;
- * Save an additional new version of the flow action applied to TRB-HRApps-Work-Feedback and set the availability to **Not available**;
- * Save an additional new version of the flow action applied to TRB-HRApps-Work and set the availability to **Final**;

QUESTION 98

Which of the following statements is true about the rule resolution process?

- * If the system finds more than one rule instance during rule resolution, users are provided with a choice of which rule to use depending on context.
- * The class (context) of a rule takes precedence over the availability of the rule.
- * If a user does not have access to the selected rule, the system sends a message that it could not find an appropriate rule to execute.
- * Rule resolution applies to rules that are instances of classes derived from the Rule-and Work-base classes.

QUESTION 99

Which requirement is a prerequisite for configuring a Pega Web Mashup?

- * No outstanding Guardrail violations
- * A web server to test your host page
- * At least one work queue in your application
- * At least one Access control policy rule

QUESTION 100

Match each condition with the correct definition.

Condition	Definition
Security	(A) A When rule returns true the request is queued.
Mapping	(B) Authentication fails when using the service.
Queue When	(C) A valid instance of the service activity cannot be found.
Service	(D) Error occurs while transforming incoming data from the request message to the clipboard

- * Security->(D), Mapping->(B), Queue When->(A), Service->(C)

- * Security->(B), Mapping->(D) ,Queue When->(A), Service->(C)
- * Security->(C), Mapping->(D) ,Queue When->(A), Service->(B)
- * Security->(B), Mapping->(A) ,Queue When->(D), Service->(C)

QUESTION 101

Which two statements about adding a pre-processing action to a flow action are true? (Choose Two)

- * The user can opt to skip the pre-processing action.
- * The action only runs the first time the flow action is performed on an assignment.
- * The action runs each time the user returns to the assignment.
- * The action automatically runs if the flow action has the highest likelihood for the assignment in the process flow.

QUESTION 102

Which two of the following options are good uses of Connect SQL rules? (Choose Two)

- * Execute SQL statements that contain database vendor specific syntax.
- * Execute custom SQL statements to improve performance of queries and updates to the PegaRULES database.
- * Update an external table as part of a distributed transaction.
- * Execute a complex SQL statement such as a join or stored procedure against an external database.

QUESTION 103

Which three options do you consider when deciding to use post-processing actions on a flow action? (Choose Three)

- * The effect if the flow action is reloaded
- * The sequence in which the system runs different actions
- * The timing of the commit for the flow action
- * The security setting for the flow action
- * The potential reuse of the flow action

QUESTION 104

The following rule and record types are invoked to determine the endpoint for a connector.

A data page property is referenced.

The value is used by the SOAP connector to invoke the service.

The SOAP Connector is invoked.

The data transform for the data page is executed if the page is not already available on the clipboard.

The data transform invokes a utility function to obtain the value of a dynamic system setting.

Select the order in which these rules and records are executed.

- * 3, 2, 4, 1, 5
- * 3, 1, 4, 5, 2
- * 3, 4, 1, 5, 2
- * 5, 4, 3, 2, 1

QUESTION 105

In the Answer Area, drag each mobile application solution on the left to the correct scenario.

Answer Area	
Mobile Application Solution	Scenario
Signed application	Gloobank wants to build a mobile app of its Pega Platform application to embed in its mobile app.
SDK application	Metrobank wants to build a mobile app for distribution on Android and iOS app stores.
Unsigned application	Localbank wants to build a mobile app for a Pega Platform application, but developer certificates cannot be distributed to app developers.

Answer Area	
Mobile Application Solution	Scenario
Signed application	Gloobank wants to build a mobile app of its Pega Platform application to embed in its mobile app.
SDK application	Metrobank wants to build a mobile app for distribution on Android and iOS app stores.
Unsigned application	Localbank wants to build a mobile app for a Pega Platform application, but developer certificates cannot be distributed to app developers.

Answer Area	
Mobile Application Solution	Scenario
Signed application	Gloobank wants to build a mobile app of its Pega Platform application to embed in its mobile app.
SDK application	Metrobank wants to build a mobile app for distribution on Android and iOS app stores.
Unsigned application	Localbank wants to build a mobile app for a Pega Platform application, but developer certificates cannot be distributed to app developers.

QUESTION 106

You are analyzing application performance and identify a data transform exceeding preferred performance parameters. Which

performance tool do you use to help troubleshoot the issue?

- * Performance Profiler
- * Database Trace
- * Performance Analyzer (PAL)
- * Tracer

QUESTION 107

You create a report that uses data from two classes .

Which of the following reporting requirements requires the use of a subreport?

- * Columns to display are: Operator Name, Last updated Case ID, Last updated Case Status, Update Date.
- * Columns to display are: Operator Name, Operator Division, Count of Purchase Requests created.
- * Columns to display are: Manager, Name, Count of operators that report to each manager.
- * Columns to display are: Operator Name, Operator Division, Count of Purchase Requests created by the operator. Filter the results by unresolved status.

QUESTION 108

The keyword Primary is a prefix to the value in the current case. You have added weighted conditions to duplicate case search in a case type .

How do you configure the condition fields to differentiate between fields on the current case and fields on the existing case?

- * Prefix the keyword Primary to the value used in the current case.
- * Suffix the keyword Primary to the value used in the current case.
- * Prefix the keyword Primary to the value used in the existing case
- * Suffix the keyword Primary to the value used in the existing case

QUESTION 109

Which option represents the relationship between mixins, controls, and formats?

- * A control specifies a format which uses a mixin.
- * A control specifies a mixin which defines a format.
- * A format uses a mixin that defines a control.
- * A mixin specifies a control which defines a format.

QUESTION 110

Your application contains the following versions of a service level named AuthorizeClaim.

Class	Ruleset	Version	Circumstance
MyCo-AccountManage-Work	AccountManage	01-01-01	None
MyCo-AccountManage-Work	AccountManage	01-01-05	.Status="Silver"
MyCo-AccountManage-Work	AccountManage	01-01-05	.Status="Gold"
MyCo-AccountManage-Work	AccountManage	01-01-05	.Status="Platinum"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Silver"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Gold"
MyCo-AccountManage-Work-AccountOpen	AccountManage	01-01-05	.Status="Platinum"

The application is being updated with a new version of the AccountManage ruleset. As part of the update, the service level is no longer circumstanced for AccountOpen cases. The update must retain the circumstancing for the other case types in the application.

Which option do you use to reset the circumstancing for the AccountOpen case type?

- * Copy the non-circumstanced rule to the AccountOpen class and select the base rule option.
- * Make the circumstanced rules in the AccountOpen class unavailable.
- * Withdraw the circumstanced rules in the AccountOpen class.
- * Block the circumstanced rules in the AccountOpen class.

QUESTION 111

Which statement describes the appropriate use of the Purge/Archive wizard to address application performance?

- * Delete any properties exposed in table columns from the BLOB.
- * Remove old cases to reduce the size of a database table.
- * Delete stored SQL procedures that have been updated.
- * Remove unused rules caches maintained on the system.

QUESTION 112

In which two of the following situations would you simulate an integration? (Choose two.)

- * The service is not available yet.
- * The service has slow response times.
- * You need to test each flow path in the case processing.
- * The connector is configured to use global resource settings.

QUESTION 113

Which two statements about building mobile applications with Pega Platform are true? (Choose Two)

- * Pega Platform allows the same certificate set to build and distribute iOS and Android applications.
- * Pega Mobile Build Server is configured in Dev Studio by using your Android or iOS developer certificates.
- * The containing application determines the layout and appearance of SDK applications.
- * Pega Mobile Build Server requires HTTPS access.

QUESTION 114

For what reason would you configure an Access Deny record?

- * To prevent users from updating cases during a particular stage of the case life cycle.
- * To prevent users from deleting attachments to a case.
- * To prevent users from performing a specific flow action.
- * To explicitly prevent users from deleting cases to satisfy a company policy.

QUESTION 115

Timesheets require the following approvals:

Regular 40 hours -> Supervisor of employee

Any overtime -> Manager of Supervisor

Worked on weekend -> VP Finance

Negative time-off balance -> HR Director

Which two conditions require an authority matrix? (Choose Two)

- * Any overtime -> Manager of Supervisor
- * Regular 40 hours -> Supervisor of Employee
- * Negative time-off balance -> HR Director
- * Worked on weekend -> VP Finance

QUESTION 116

Your application is deployed to the cloud. A data source outside your application populates a data page by using your data access pattern configuration. You receive complaints that the system takes a long time to fetch data each time the case worker accesses information for a different customer.

Which approach solves this performance issue?

- * Move to local installation because network traffic in cloud deployment is often slow.
- * Change snapshot data access method to reference pattern data access method.
- * Fetch only the targeted data from the database each time data is needed so access is faster.
- * Access data page with a predefined key so that, once loaded, data access is faster.

QUESTION 117

What is the purpose of the Policy Verification landing page when configuring a security solution in Pega Platform?

- * To test if a user has the required access to a case
- * To manually authenticate a specific user on an integrated external database
- * To test if a user's channel-specific password meets defined property requirements
- * To configure mapping of access control attributes

Pegasystems PEGAPCSSA86V1 Exam Syllabus Topics:

TopicDetailsTopic 1- Identify the role of access control policies in securing an application- Create an application with the New Application wizardTopic 2- Identify the role and impacts of application versioning; Use of ruleset skimming- Identify how circumstancing affects application behaviorTopic 3- Circumstance rules on a single variable or multiple variables- Measure System Performance; use of performance-related toolsTopic 4- Identify the role and elements of activities in case processing- Secure data with client-based access controlTopic 5- Design applications for mobile use; use of certificate sets- Configure Pega Web Mashup authenticationTopic 6- Manage concurrent case access; Locking strategies- Expose an application with a web service

100% Free PEGAPCSSA86V1 Daily Practice Exam With 276 Questions:
