Introduction to SAP C_SAC_2021: SAP Certified Application Associate - SAP Analytics Cloud: Planning Exam

The ?SAP Certified Application Associate - SAP Analytics Cloud: Planning? certification exam verifies that the candidate possesses the fundamental and core knowledge required of the SAP Analytics Cloud Planning Consultant profile. This certification proves that the candidate has an overall understanding and technical skills to participate as a member of a project team. This certification is recommended as an associate level qualification.

To ensure success, SAP recommends combining educational courses and hands-on experience to prepare for your certification exam as questions will test your ability to apply the knowledge you have gained in training. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). All SAP consultant certifications can be booked as Cloud Certifications in the Certification Hub using the product code CER006. You can take up to six tests of your choosing in one year with CER006 - SAP certification - from wherever and wherever it suits you! Test dates can be individually selected and booked. There are a number of training techniques for and particular credentials. They are described as ?Topic Areas? and are found on each summary of the examination. You will see the number of questions, the length of the examination, the areas to be tested, and the suggested courses and materials. Certification examinations can include unregistered products checked for forthcoming examination releases. These unmarked items are altered randomly among the subjects and are not included in the final ranking. The total number of exam items announced in the Training Shop can never exceed when non-scored items are included.
