

(2022) PASS H12-425_V2.0-ENU Exam Free Practice Test with 100% Accurate Answers [Q130-Q154]

(2022) PASS H12-425_V2.0-ENU Exam Free Practice Test with 100% Accurate Answers
H12-425_V2.0-ENU dumps Free Test Engine Verified By It Certified Experts

NO.130 What are the main reasons for the energy saving effect of closed cold/hot aisle? (Multiple choice)

- * Isolate the cold air, avoid the confusion of the hot air, and improve the utilization rate of the air
- * It can increase the supply air temperature of the air conditioner, thereby reducing the energy consumption of the air conditioner
- * The closed hot aisle can increase the return air temperature and improve the cooling efficiency
- * By increasing the supply air temperature, the amount of humidification is reduced, thereby reducing the power consumption of humidification

NO.131 What kind of incoming and outgoing lines can be realized by the FusionModule2000 integrated power distribution cabinet?

- * Under the line and under the line
- * Up in and out on the line
- * Top-in and bottom-out lines
- * Down in and out on the line

NO.132 What operations can be performed in the NetEco “Report Task” interface? (Multiple choice)

- * View Report Tasks
- * Create report task
- * Start the report task
- * Stop the report task

NO.133 How many 12v batteries can the optional battery inspection instrument of UPS5000-A-400/500K support?

- * 24
- * 12
- * 32
- * 40

NO.134 UPS5000-E only needs to select () to easily realize the N+X power supply system. The operation is simple and convenient. (Fill in the blank)

- * Parallel cable

NO.135 In FusionModule1000B series solutions, when 2N power supply and distribution system is selected, can meet TIER4 wind power requirements.

- * True
- * False

NO.136 Which of the following voltage systems does the UPS5000-E support? (Multiple choice)

- * 380V
- * 480V
- * 415V
- * 400v

NO.137 Regarding the FusionModule2000 wiring, which of the following statements is wrong?

- * Cross-channel routing is through the control skylight
- * The wiring trough supports the separation of strong and weak electricity
- * The power distribution cabinet/integrated UPS cannot be placed at the head of the column
- * Cross-channel routing requires installation of cable ladders

NO.138 The PDU8000 precision power distribution cabinet supports the monitoring of branch circuit phase current, active power, electric energy and branch circuit switch status.

- * True
- * False

NO.139 The FusionModule800 does not need to be charged with refrigerant on site within 30m of the connecting pipe.

- * True
- * False

NO.140 When the outdoor units of Huawei air-cooled air conditioners are installed horizontally, the distance between the two outdoor units is ? () MM.

- * 400
- * 800
- * 1200
- * 2000

NO.141 UPS5000-A supports the adjustable number of battery cells, which avoids the replacement of a whole group caused by a single battery failure, and solves the problem of difficult maintenance of traditional UPS batteries in the range of 30-40 cells.

- * True
- * False

NO.142 How many temperature and humidity monitoring modules are required for each temperature control product?

- * 1
- * 2
- * 3
- * 4

NO.143 ATS (Automatic Transfer Switch) must overflow the manual operating handle in the case of automatic mode.

- * True
- * False

NO.144 The temperature control laboratory has passed the GMPI certification.

- * True
- * False

NO.145 The terminal power of the battery in the open circuit state is called ().

- * Rated voltage
- * Discharge voltage
- * Open-circuit voltage
- * Actual voltage

NO.146 On the panel of the air-conditioning unit, in the group control topology diagram, the difference between this unit and other units is that there is a green frame.

- * TRUE
- * FALSE

NO.147 Which of the following is a component of Huawei's indirect evaporative cooling system? (Multiple Choice)

- * Indirect heat exchange system
- * Mechanical supplemental cooling system
- * Sprinkler System
- * Electronic control system

NO.148 What is the maximum capacity of the power module of the UPS5000-E?

- * 30kVA
- * 20kVA
- * 50kVA
- * 40kVA

NO.149 When the battery status of the UPS2000G is NA, it may be ().

- * The battery is not connected
- * Battery Low Voltage
- * The battery connection is normal
- * The battery N line is not connected

NO.150 The PUE value of the data center is close to 1, indicating that the energy efficiency level is better.

- * TRUE
- * FALSE

NO.151 If the customer has high requirements on the availability of the management system and requires that the normal use of the system is not affected by a single point of failure of the hardware, the NetEco management system can provide a high-availability solution of dual-system backup. In the dual-computer solution, what hardware resources are required by NetEco?

- * 2 servers + 1 disk array + 1 switch
- * 2 servers + 2 disk arrays + 3 switches
- * 1 server + 1 t-disk array + 2 switches
- * None of the above is true

NO.152 Which of the following are the accessories for UPS5000-A-400/500K? (Multiple choice)

- * Battery temperature sensor
- * Port battery inspection instrument
- * Dry contact expansion board
- * Upper air outlet assembly

NO.153 Video can only be viewed on NETECO after the video camera has been configured on the IVS.

- * True
- * False

NO.154 When a fire breaks out in the box and the fire extinguishing device releases the fire extinguishing agent into the protection area, () will display the words “In The Vent, Do Not Enter”.

- * Fire alarm
- * Sound and light alarm
- * Deflation indicator light
- * Emergency Lights
