**Scope of SAP C\_HANADEV\_17: SAP Certified Development Associate - SAP HANA 2.0 SPS05 Exam**  
All SAP consultant certifications are available as Cloud Certifications in the Certification Hub and can be booked with product code CER006. With CER006 - SAP Certification in the Cloud, you can take up to six exams attempts of your choice in one year - from wherever and whenever it suits you! Test dates can be chosen and booked individually.

Each specific certification comes with its own set of preparation tactics. We define them as 'Topic Areas' and they can be found in each exam description. You can find the number of questions, the duration of the exam, what areas you will be tested on, and recommended course work and content you can reference. Certification exams might contain unscored items that are being tested for upcoming releases of the exam. These unscored items are randomly distributed across the certification topics and are not counted towards the final score. The total number of items for an examination as advertised in the Training Shop is never exceeded when unscored items are used.

Please be aware that the professional- level certification also requires several years of practical on-the-job experience and addresses real-life scenarios. This certificate verifies the fundamental knowledge to become an SAP consultant, ensuring that the candidate is skilled enough at practically applying the knowledge gained through SAP C\_HANADEV\_17 pieces of training and practical experience of working within the projects. **C\_HANADEV\_17 practice exams** is the best learning material for the examination.

## Topics of SAP C\_HANADEV\_17: SAP Certified Development Associate - SAP HANA 2.0 SPS05 Exam

The SAP C\_HANADEV\_17 (SPS05) exam is designed based on the implementations, management and customization areas which cover the entire SAP C\_HANADEV\_17 Development. Following are the major topics along with their weight-age in the examination, giving you a clear view of which topics, you should focus on for the certification of SAP C\_HANADEV\_17 (SPS05).

Note: SAP reserves the right to change and update the content (topics, items and weight-age) at any point or time.

- Operations of SAP C\_HANADEV\_17: more than 12%

Knowledge of setting up an administration and operational strategy for SAP C\_HANADEV\_17. Using SAP C\_HANADEV\_17 Studio and HDBSQL to Start, Stop, Analyze Performance, and Transport Management.

- Monitoring of SAP C\_HANADEV\_17: more than 12%

Knowledge of using DBA Cockpit, SAP C\_HANADEV\_17 Studio, SAP C\_HANADEV\_17 Cockpit, and the trace files to set up and execute monitoring for SAP C\_HANADEV\_17.

- System Architecture: 8 to 12%

Knowledge of designing system architecture for SAP C\_HANADEV\_17 implementation includes hardware sizing, data persistence, network requirements, and integration with the existing customer landscape.

- Users & Authorization: 8 to 12%

Knowledge of setting up authorization traces for describing SAP C\_HANADEV\_17 authorization concept, different authorization privileges, and SAP C\_HANADEV\_17 database repository.

- Security: 8 to 12%

Knowledge of Describing SAP C\_HANADEV\_17 authorization and authentication concepts and setting up the encryption techniques and auditing processes for SAP C\_HANADEV\_17.

- Backup & Recovery: 8 to 12%

Knowledge of designing a strategy for backup and recovery of SAP C\_HANADEV\_17. Also, understand the backup catalog and the configuration files for database copy scenarios.

- Troubleshooting for SAP C\_HANADEV\_17: 8 to 12%

Knowledge for analysing system files, using SQL console, and troubleshooting SAP C\_HANADEV\_17 system performance by configuring traces.

- SAP C\_HANADEV\_17 Installation & Upgrades: 8 to 12%

Knowledge of evaluating pre-requisites for SAP C\_HANADEV\_17 installations, verifying hardware and operation systems, and describing installation and post-installation tasks.

- Database Migration to SAP C\_HANADEV\_17: 8 to 12%

Knowledge of describing Database Migration Operation (DMO) benefits. Its procedure steps, different migration options, preparation steps, and techniques to reduce downtime.

- High Availability & Disaster Tolerance: less than 8%

Knowledge of designing a strategy for high availability and disaster recovery, explaining high availability and system replication features of SAP C\_HANADEV\_17.

Based on the above-mentioned syllabus and their related weight-age, it is clear that there is no one topic a candidate should focus on or a candidate can leave while preparing for the examination. It is important for the candidate to go through and be proficient in each and every topic. **C\_HANADEV\_17 exam dumps** is the best preparation material for this examination.

**Q27.** After reviewing the SQL Analyzer results, which of the following would you consider for optimizing the performance? There are 2 correct answers to this question

- \* Re-prioritize with Workload Management.
- \* Change the data model.
- \* Use CE functions.
- \* Modify SQL hints.

**Q28.** You need to synchronize all unsynchronized changes of the remote GIT branch with a local GIT branch.

Which operation do you use?

- \* Pull
- \* Push
- \* Rebase
- \* Reset

**Q29.** What are the key characteristics of the calculation view's Input Parameter? There are 3 correct answers to this question.

- \* It can NOT be used to filter measure values.
- \* It can be used in a conditional expression.
- \* It can be used to pass values to table functions.
- \* It is passed via reserved word PLACEHOLDER.
- \* It is passed using a WHERE clause.

**Q30.** Which tool do you use to create a calculation view in a multi-target application?

- \* SAP HANA database explorer
- \* SAP HANA studio
- \* SAP HANA Web-based Development Workbench
- \* SAP web IDE for SAP HANA

**Q31.** You developed a multi-target application that contains only a database module. Which environment are the runtime objects created in? Please choose the correct answer.

- \* Java Runtime Environment (JRE)
- \* SAP HANA Runtime Tools (HRTT)
- \* SAP Web IDE for SAP HANA
- \* HANA Deployment Infrastructure Container

**Q32.** Which parameters do you need for the APPLY\_FILTER function? Note: There are 2 correct answers to this question.

- \* Filter condition
- \* Dataset
- \* Join condition
- \* Entity set

**Q33.** For what do you use the RESIGNAL statement in SQLScript?

- \* System exceptions
- \* Specific SQL error codes
- \* Generic SQL exceptions
- \* User-defined exceptions

**Q34.** Which configuration file indicates the program that is executed upon startup when you run the Node.js module?

- \* mta.yaml
- \* project.json
- \* package.json
- \* server.js

**Q35.** Which URL query options are available with XSODATA v2.0? Note: There are 3 correct answers to this question.

- \* \$top
- \* \$filter

- \* \$select
- \* \$view
- \* \$read

**Q36.** You need to consume a Node.js service in an SAPUI5 application.

In which section of the mta.yaml file do you define the variable for the exposed service?

- \* In the properties section of the MTAResources
- \* In the requires section of the HTML5 module
- \* In the provides section of the Node.js module
- \* In the path section of the Node.js module

**Q37.** You need to debug a Node.js application using SAP Web IDE for SAP HANA.

What must you do?

Note: There are 3 correct answers to this question.

- \* Open the debugger.
- \* Attach debugger to the node module.
- \* Specify the proper GIT repository in the debug properties.
- \* Set a breakpoint in the application.
- \* Build the application with the debug option.

**Q38.** Which development environment does SAP recommend to develop an SAP HANA extended application services; advanced model (XS advanced) multi-target application?

- \* SAP HANA studio
- \* ASAPdevelopment tools
- \* SAP web IDE for SAP HANA
- \* SAP HANA Web-based Development Workbench

**Q39.** Which artifacts do you define in the persistence model to access objects in an external SAP HANA Deployment Infrastructure container?

- \* Imports
- \* Synonyms
- \* Views
- \* Procedures

**Q40.** Which SAP HANA extended application services, advanced model (XS advanced) tools can you use to retrieve the URL for the SAP Web IDE for SAP HANA? Note: There are 2 correct answers to this question.

- \* advanced Command Line client tool
- \* XS advanced Controller Start Screen
- \* Organization and Space Management tool
- \* Runtime tool

**Q41.** To comply with the SAP Fiori principles, which view type is recommended by SAP?

- \* JSON
- \* XML
- \* HTML
- \* JavaScript

**Q42.** You use `APPLY_FILTER` to add a dynamic `WHERE` clause on `SELECT` statements.

On which objects can you apply the filter?

Note: There are 2 correct answers to this question.

- \* Database tables
- \* Intermediate table variables
- \* Virtual tables
- \* Scalarvariables

**Q43.** Which parameter do you adapt to change the file that is initially delivered by an HTML5 module? Please choose the correct answer.

- \* `Service_url` parameter of the `mta.xml` file
- \* `Start` parameter of the `package.json` file
- \* `Runners` parameter of the `project.json` file
- \* `Welcome file` parameter of the `xs-app.json` file

**Q44.** You are working on an entity using Core Data Services.

Which properties can you define inside the Technical Configuration section?

Note: There are 2 correct answers to this question.

- \* Import
- \* Storage Type
- \* Index
- \* Association

**Q45.** Which of the following activities are part of the development lifecycle using SAP HANA extended application services, advanced model (XS advanced)?

Note: There are 3 correct answers to this question.

- \* Synchronize source with GIT repository
- \* Store source in SAP HANA repository
- \* Activate artifacts via `_SYS_REPO`
- \* Create an MTA project
- \* Export project as MTA archive

**Q46.** What are the disadvantages when deploying Dynamic SQL? There are 2 correct answers to this question.

- \* No possibility to use `SQLScript` variables
- \* No possibility to bind the result to a `SQL Script` variable
- \* Additional `SQL` execution privileges are required
- \* Limited opportunities for optimization

**Q47.** You work on a multi-target application that uses the SAP HANA Deployment Infrastructure (HDI). Which operations can you perform in the SAP Web IDE for SAP HANA? There are 2 correct answers to this question.

- \* Create objects in the SAP HANA repository.
- \* Choose the supported SAP HANA versions.
- \* Configure the artifact namespaces.
- \* Deploy HTML5 modules to the SAP HANA database.
