## [Q31-Q49] Latest SAP C-C4H450-04 First Attempt, Exam real Dumps Updated [Aug-2022]

**Latest SAP C-C4H450-04 First Attempt, Exam real Dumps Updated [Aug-2022]** Get the superior quality C-C4H450-04 Dumps Questions from ValidExam. Nobody can stop you from getting to your dreams now. Your bright future is just a click away! **NO.31** Where do you map the SAP Cloud Platform Integration client certificate to a user in SAP S/4HANA?

- \* In the VUSREXTID table view
- \* In report RCOD\_CREATE\_CONNECTIVITY\_SIMPL
- \* In transaction STRUST
- \* In transaction SOAMANAGER

**NO.32** Which steps do you need to perform in SAP Process Orchestration when it is used for integration with SAP Cloud for Customer? Note: There are 2 correct Answers to this question.

- \* Define the technical and business system for SAP S/4HANA and SAP Cloud for Customer.
- \* Set up the secure connection (SSL) in SAP S/4HANA.
- \* Import the Enterprise Services Repository content.
- \* Create an RFC destination to SAP Cloud for Customer.

**NO.33** What functions does SAP Web Dispatcher perform when you use it as a reverse proxy? Note: There are

3 correct Answers to this question.

- \* Block forward proxy requests.
- \* Verify client certificates.
- \* Communicate via SSL from the demilitarized zone of the customer's network.
- \* Convert HTTP to HTTPS for SAP Cloud for Customer communication to on-premise applications.
- \* Terminate the SSL when an inbound request is received.

**NO.34** You are using SAP Cloud Platform Integration as your middleware. You need to configure basic authentication to send messages from SAP S/4HANA to SAP Cloud for Customer. What are the configuration steps for SAP Cloud Platform Integration?

Note: There are 2 correct Answers to this question.

- \* Deploy a user credential artifact on SAP Cloud Platform Integration containing the user ID of the SAP S/4HANA communication user.
- \* Deploy a user credential artifact on SAP Cloud Platform Integration containing the user ID of the SAP Cloud for Customer communication user.
- \* Update the integration flow parameters with the host of SAP Cloud for Customer and the relevant credential name.
- \* Update the integration flow parameters with the host and path of the SAP Cloud for Customer Web service.

**NO.35** What is SAP's recommendation for data filtering when using IDoc communication?

- \* Use the standard filtering fields in the ALE distribution model. If this is NOT sufficient, use the IDOC\_CREATION\_CHECK BAdI.
- \* Use the change pointers BAdI, IDOC\_DATA\_MAPPER. If this is NOT sufficient, use the IDOC\_CREATION\_CHECK BAdI.
- \* Use custom BAdIs to ensure other integrations are NOT impacted by SAP Cloud for Customer integration.
- \* Use a condition filter in the middleware to ensure other integrations are NOT impacted and all filtering logic can be maintained in one central place.

**NO.36** Which objects are replicated unidirectionally from SAP CRM to SAP Cloud for Customer? Note: There are

2 correct Answers to this question.

- \* Business roles
- \* Products
- \* Territories
- \* Quotes

[NoArtifactDescriptorFoundForArtifactName]:No artifact descriptor found for artifactName C4C\_0M1R00R\_TR16. What could be the problem? Note: There are 2 correct Answers to this question.

- \* The authentication artifact name was spelled incorrectly in the integration flow configuration.
- \* The basic authentication artifact was not deployed
- \* The client certificate uploaded into the integration flow has no credentials.
- \* The SAP Cloud Platform Integration certificate has expired.

**NO.38** A new extension field was created with the SAP Cloud for Customer key user tool. On which tab of the field definition do you add the extension field so that it is available for A2A integration?

- \* Reporting
- \* Additional Business Contexts
- \* Extension Scenarios

\* Services

**NO.39** Where do you import the SAP Cloud for Customer client certificate in SAP Cloud Platform Integration when certificate authentication is used for the communication?

- \* In the receiver system of the integration flow
- \* In the keystore artifact
- \* In the OAuth2 authentication artifact
- \* In the sender system of the integration flow

**NO.40** What are the benefits of using SAP Web Dispatcher as the reverse proxy to integrate SAP Cloud for Customer with on-premise solutions? Note: There are 2 correct Answers to this question.

- \* Decoupling of the consumer from the service
- \* Increased performance by caching
- \* IP filtering in the firewall and in SAP Web Dispatcher
- \* A single line of defense

**NO.41** While monitoring messages in SAP Cloud Platform Integration, you see the following error:

[NoArtifactDescriptorFoundForArtifactName]:No artifact descriptor found for artifactName C4C\_0M1R00R\_TR16. What could be the problem? Note: There are 2 correct Answers to this question.

- \* The authentication artifact name was spelled incorrectly in the integration flow configuration.
- \* The basic authentication artifact was not deployed
- \* The client certificate uploaded into the integration flow has no credentials.
- \* The SAP Cloud Platform Integration certificate has expired.

**NO.42** What settings are created when you execute the connectivity report on SAP ERP?

- \* Ports, RFC function modules, outbound/inbound IDocs, and segment filters
- \* RFC destinations, partner profiles, ALE distribution model, and report variants for periodic batch jobs
- \* Ports, service bindings, change pointer activation, and report variants for periodic batch jobs
- \* RFC destinations, service bindings, partner profiles, ALE distribution model, and classes

**NO.43** Where can you verify My System ID (which serves as tenant ID) in the SAP Cloud for Customer configuration?

- \* Service Control Center
- \* Communication Arrangements
- \* Communication Systems
- \* Business Configuration

**NO.44** How do you resolve mapping errors related to the sales organization unit in SAP Cloud for Customer?

- \* Adjust value mapping.
- \* Configure communication arrangements.
- \* Perform ID mapping.
- \* Adjust code list mapping.

**NO.45** What security features of SAP Web Dispatcher do you use when integrating SAP Cloud for Customer with on-premise solutions? Note: There are 3 correct Answers to this question.

- \* Threat notification
- \* Certificate forwarding
- \* Security log
- \* SSL termination
- \* SSL user mapping

**NO.46** What filter options can you use to filter messages in Web Service Message Monitoring in SAP Cloud for Customer? Note: There are 2 correct Answers to this question.

- \* XML payload
- \* Direction
- \* Service interface
- \* User-defined status

**NO.47** When integrating Marketing Attributes between SAP CRM and SAP Cloud for customer, how is information exchanged? Note: There are 2 correct Answers to this question.

- \* Marketing Attribute Definition is uni-directional
- \* Marketing Attribute Definition is bi-directional
- \* Marketing Attribute Values are uni-directional
- \* Marketing Attribute Values are bi-directional

**NO.48** You create a new field in SAP Cloud for Customer, which should also be available in SAP S/4HANA. When do you need to extend the business partner message in SAP S/4HANA?

- \* When the WSDL is downloaded from SAP Cloud for Customer and uploaded into SAP S/4HANA
- \* When the mapping in SAP Cloud Platform Integration or SAP Process Orchestration needs to be updated
- \* Only when the extension field is added using the software development kit (SDK)
- \* When the field added to SAP Cloud for Customer is NOT available in the Web service used by SAP S/4HANA

**NO.49** What action is required when you receive the connectivity error ICM\_HTTP\_SSL\_ERROR in SAP Cloud for Customer?

- \* Request and upload a new certificate from the certificate authority.
- \* Change the URL to use HTTPS.
- \* Upload the Root certificates to the SAP Cloud for Customer Trust store.
- \* Upload the client certificate to the communication arrangement.
