# [Q25-Q49 1z0-1077-22 Free Update With 100% Exam Passing Guarantee [2022

1z0-1077-22 Free Update With 100% Exam Passing Guarantee [2022]
[Sep-2022] Verified Oracle Exam Dumps with 1z0-1077-22 Exam Study Guide

**Q25.** Which three predefined orchestration groups should you use while assigning an orchestration process to fulfillment lines in process assignment rules? (Choose three.)
* Standard
* Model / Kit
* Order Type
* Shipment Set
* Order Attribute

**Q26.** Which two statements describe Net Change Collection? (Choose two.)
* Data for the selected entities is replaced in the planning data repository.
* It completely refreshes the planning data repository.
* Data for the selected entities isdeleted from the planning data repository.
* It collects only changed data to the planning data repository.
* It collects data only incrementally to the planning data repository.

**Q27.** You are using collaboration messaging to send an advanced shipment notice to atrading partner. You see an error with the status &#8220;B2B Error.&#8221; What does this status indicate?

* It indicates that collaboration messaging is not supported in Order Management.
* It indicates that the message has not been delivered because of a validation error in Collaboration Messaging Framework.
* It indicates that the SOA suite could not deliver the message because of a configuration or processing error.
* It indicates that the message has not been processed because an administrator has put it on hold.
* It indicates that the message has not been delivered because of a configuration or processing error in Collaboration Messaging Framework.

**Q28.** Which two statements are true about the functional capabilities of Oracle Cloud Configurator? (Choose two.)
* For users who do not have access to Oracle Fusion Product Hub, Oracle provides an alternative option to create models directly in the workspace area.
* Only the optional structure and attributes of a Product Item are imported from Product Hub to Configurator and not the mandatory elements because they cannot be configured by an end user.
* Multiple drafts of the same model can be modified at the same time, but they must be indifferent workspaces.
* The user interface pages are tightly connected to the model. You cannot add, delete, or reorder pages without affecting the model structure.
Explanation

&#8220;Configurator models are imported from items maintained in Oracle Fusion Product Hub (which is accessed by the Product Information Management work area) that have a Structure Type of Model. Only the optional structure and attributes of the product item are imported, because the required elements of the product item cannot be configured by an end user. The option classes and optional standard items for each model item are also imported.&#8221;&#8221;Configurator models are versioned objects. A model can go through multiple drafts before being released in a series of versions.Therecan be multiple drafts of the same model being modified at the same time, but they must be in different workspaces. A message notifies you if you add a model to a workspace when another draft exists in another workspace. There can only be a single released version of a model with the same effective start date.&#8221; References:

**Q29.** Which action must be performed on the orchestration process user interface to activate an orchestration process after the order orchestration configurations are completed?
* Download the generated orchestration process.
* Validate the orchestration process.
* Release the orchestration process.
* Release and deploy the orchestration process.
Explanation

https://docs.oracle.com/en/cloud/saas/supply-chain-management/r13-update17d/faiom/setting-up-orchestration-p

**Q30.** You want to decrease the implementation time for Order Management by using the Quick Start feature. Select the accurate list of four areas that you can configure by using the Quick Start feature.
* Objects in receiving, objects in advanced fulfillment, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order
* Default general shipping parameters, objects in order management parameters, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order
* Default general shipping parameters, objects in order management parameters, objects in advanced fulfillment, and orchestration process for shipping and returning an order
* Objects in advanced fulfillment, default pick release attributes for the shipping parameters of inventory facilities, objects in receiving, objects in order management parameters
* Default general shipping parameters, objects in receiving, default pick release attributes for the shipping parameters of inventory facilities, and orchestration process for shipping and returning an order

**Q31.** A revision was made to an existing sales order in Order Management Cloud. But it did not trigger a change order.

Identify the attribute that was modified during the revision of the sales order.
* Requested Ship Date
* Customer PO
* Unit Selling Price
* Ordered UOM
* Ordered Quantity

**Q32.** Your customer uses an external order capture system and wants to perform certain actions without routing them through Order Management. Which three services are available for the external system to call from Global Order Promising using public web services? (Choose three.)
* Return Order Lines
* Ship Order Lines
* Cancel Scheduling
* Schedule Order Lines
* Check Availability

**Q33.** You are using the Check Availability feature to explore alternative ways of promising a batch of five fulfillment lines in simu-lation mode.

Which three attributes can you change to explore other promising options? (Choose three.)
* Requested Quantity
* Requested Ship-from warehouse
* Requested shipping method
* Allow substitute items
* Requested ship date
* Scheduled ship date
Explanation

The values for the attributes thatbegin with requested, such as the Requested Item attribute and the Requested Ship-from Warehouse attribute, are initially determined by what the values are when you select the line in the Order Orchestration work area. You cannot change the values for many of the requested attributes, such as the Requested Item attribute, the Requested Quantity attribute, and the Requested Ship Date attribute. You can change or clear the values for the Requested Ship-from Warehouse attribute and the Requested Shipping Method attribute. There are also some additional attributes you can change, such as whether substitutions are allowed, to influence the results when you explore other promising option.

**Q34.** Your company wants to revise an existing sales order in Order Management Cloud to compensate the downstream legacy fulfillment system that does not allow any update to the already interfaced fulfillment lines.

What type of compensation pattern rule would you need to dene for the orchestration process fulfillment step?
* Define one rule of type CREATE.
* Define one rule of type UPDATE.
* Define two rules: one of type CANCEL and another of type CREATE.
* Define one rule of type CANCEL_CREATE.
Explanation

A rule that you can set on an orchestration process step that specifies the adjustments to make when an order changes.Undo, Redo, Update, Cancel, and None are each an example of a compensation pattern. For example, assume thecompensation pattern for a

Create Shipment step is Redo, and that this step calls the Cancel service and the Create service.If Order Management receives a change order that includes a new warehouse for this step, then itruns the Cancel serviceand the Create service again.

**Q35.** Your company wants to default the preferred fulfillment warehouse and scheduled ship date as order requested date during order import and skip the scheduling task for a particular order type.

What are the two business rules that must beconfigured to achieve this requirement? (Choose two.)
* Define a branching condition rule.
* Define a lead time expression rule.
* Define a line selection criteria rule for the scheduling task.
* Define a compensation pattern rule.
* Define apre-transformation defaulting rule.

**Q36.** In the Cloud Order Managementsystem, identify the function performed by the External Interface Layer.
* It manages the communication between Order Management and external or internal fulfillment systems.
* It sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
* It receives information from upstream order capture systems, sends information to downstream fulfillment systems, and interprets responses and updates from those systems.
* It imports orders and processes them to fulfillment lines before assigning them to fulfillment systems.

**Q37.** You are implementing Oracle Cloud Pricing for a Fortune 500hi-tech components distributor who operates on wafer thin margins.

Identify a pricing rule associated with a pricing strategy that can be used for evaluating the margin.
* Currency conversion lists
* Cost Lists
* Discount Lists
* Price Lists
* Shipping charge lists

**Q38.** Your customer wants to use Oracle Integration Cloud Service with Order Management to communicate business events. Select the option that shows the correct order in which the steps should be executed.
* Manage business event trigger points, create an integration, create a connection, and track business events.
* Track business events, manage business event trigger points, and create an integration.
* Manage business event trigger points, create a connection, create an integration, and track business events.
* You cannot use Oracle Integration Cloud service with Order Management to communicate business events.
* Create an integration, create a connection, and track business events.

**Q39.** A global Power Systems manufacturer sells Uninterrupted Power Supply (UPS) products through its online portal. To gain competitive advantage, the manufacturer wants to enhance the ability of buyers to select a desired configuration of the high-end UPS models through guided selling options on its online selling portal.

The company&#8217;s product development team has finalized the enhancements, and needs your help to get them implemented on their online selling portal that is supported by Oracle Cloud Configurator.

What four actions would you take in Oracle Cloud Configurator to enhance a buyer&#8217;s experience? (Choose four.)
* You can allow buyers to raise requests if an expected product functionality is not offered.
* You can create enhancements to the model structure that supplements the imported configurable structureof a model item.
* You can create rules that will guide users in creating a valid model.
* You can create user interfaces that will be dynamically presented to users based on the options chosen in the Configurator model.

* You can test the behavior of the configured model anytime when you are editing it.
* You can enable a checkout option for a model when a valid configuration is finalized.
* You can display product reviews of customers who have purchased the same configuration earlier.

**Q40.** Which step must be performed before enabling a new inventory organization in SCM cloud for collection from Manage Upstream and Downstream Source System Task?
* Add the Organization against the OPS destination system.
* Add the Organization against the OPS source system manually.
* Refresh the Organization List against the Oracle Planning and Sourcing (OPS) source system.
* Create a new source system for each organization.
Explanation

https://docs.oracle.com/en/cloud/saas/supply-chain-management/r13-update17d/faivc/implementing-planning-so

**Q41.** Which three attributes in the orchestration process definition utilize Oracle business rules to make runtime decisions forprocess behavior? (Choose three.)
* Cost of Change
* Exit Criteria
* Line Selection Criteria
* Start After conditions
* Evaluation Sequence
Explanation

https://docs.oracle.com/en/cloud/saas/supply-chain-management/r13-update17d/faiom/setting-up-orchestration-p

**Q42.** Yourcustomer requires changes be made to the Order Management work areas. The customer would like to rearrange the tab layout and hide attributes. Which statement is true about this requirement and customizations that an administrator will be able to make?
* An administrator can only hide attributes and cannot rearrange the tab layout.
* An administrator can rearrange the tab layout, hide attributes, and add custom components such as links.
* An administrator cannot customize anything within the Order Management work areas.
* An administrator can rearrange the tab layout, hide attributes, and change default widths of columns and panels.
* An administrator can only add content and rearrange the tab layout. They cannot hide attributes.

**Q43.** Identify the sequence of Oracle Management Cloud components involved while processing a sales order.
* Order Entry, Orchestration, Task Layer Services, External Interface Layer
* External Source Systems, Internal Systems, Orchestration, Task Layer Services, External Interface Layer
* External Source Systems, Order Entry, Orchestration, Task Layer Services, External Interface Layer
* External Source Systems, Order Entry, Orchestration, External Interface Layer, Task Layer Services

**Q44.** Your company has a cost of change policy that changes a customer when the order is allocated, with no changes allowed after the goods are staged.

Which fulfillment status will trigger compensation and impose charges on the customer when the sales order quantity is changed?
* Backordered
* Ready to Release
* Released to Warehouse
* Staged
Explanation

https://docs.oracle.com/cd/E51367_01/scmop_gs/FAOFO/F1433056AN132D9.htm

**Q45.** Which three statements are false in regard to integrating public Global Order Promising web services with external order capture and management systems? (Choose three.)
* You can collect Sales Orders that arescheduled in external order management systems into Global Order Promising.
* No steps are required to enable calling Global Order Promising by using public web services.
* The services cannot be used to inquire about the availability of supply for a potential order before the order is created in Oracle Order Management.
* Several steps are required to enable calling Global Order Promising by using public web services.
* You cannot collect Sales Orders that are scheduled in external order management systems into Global Order Promising.

**Q46.** Identify the transformation type in which a transactional item attribute is used for transforming a product. The transformation may be added to the existing product or replace the product on the sales order for a CTO item.
* Attribute to Product
* Product to Product
* Context to Product
* Attribute to Attribute
Explanation

An attribute-to-product transformation uses transactional attributes to transform an attribute to an item number. It can add the transformation to an existing item or replace the item that the source order references.

Assume your company receives orders for an MP3 player that includes a Color attribute and a Size attribute, and that you must use a combination of these attributes to reference an item number. In the following example, a transformation rule transforms the Color and Size attributes of the Mini Plus item to the VIS481 item. Order Management displays VIS481 on the order line.

References:

**Q47.** Identify the task that the seeded Warehouse Operator role can perform.
* monitor and release sales orders for picking in the warehouse
* search for a pick slip and confirm it
* process and confirm outbound shipments
* generate outbound shipping documentation
* generate pick slips for picking material for outbound material movement
Explanation

The warehouse operator does the following work:Pick loads, including monitoring andperforming the picking activity, and create pick slips for outbound shipments, replenishment, and requisition.Search for a pick slip and confirm the pick slip in a single action.

**Q48.** Your company wants a category of goods to be globally sourced for certain regions in Europe. After setting up the sourcing rules, you attempt to assign them by using the Category andRegion option, but the category is not on the list of values.

What is the problem?
* The Default Sourcing Assignment Set prole option is not set.
* The category set that is associated with the Sourcing Rule Category Set prole option is controlled atthe organization level.
* The Default Sourcing Assignment Set prole option is set to a category set for the Item category set structure.
* A category set has not been selected under the Sourcing Rule Category Set prole option.

**Q49.** Identify three ongoing maintenance tasks that a user is required to execute from the Order Management Work Area after the Order Management Implementation is completed. (Choose three.)

* Manage Fulfillment Line Exceptions
* Manage Order in Errors
* Manage Order Orchestration Messages
* Manage Source Systems
* Manage Orchestration Statuses
