NEW QUESTION 11

A planner wants to interactively resolve an overload situation on a resource using advanced planning tools without any automatic rescheduling activity by the system.

Which combination of settings for resource and detailed scheduling strategy are required to receive related alerts?

- * Infinite resource and infinite strategy
- * Finite resource and finite strategy
- * Finite resource and infinite strategy
- * Infinite resource and finite strategy

NEW QUESTION 12

How can you carry out cost object controlling for production orders? Note: There are 2 correct answers to this question.

- * Cost-related
- * Order-related
- * Milestone-related

- * Product-related

NEW QUESTION 13

What does it mean for the production planner when MRP works with infinite capacities?

- * MRP assigns capacity requirements automatically to work center is with the earliest available capacity.
- * MRP creates capacity requirements without checking the capacity of a work center.
- * MRP creates capacity requirements only if the work center has sufficient capacity.
- * MRP assigns capacity requirements automatically after the last scheduled order on a work center.

NEW QUESTION 14

A material has been set up as a phantom assembly by entering the special procurement key in the material master. How can you switch off the phantom assembly in a specific bill of material(BOM)?

- * Change the item category of the phantom assembly in the BOM.
- * Change the explosion type of the phantom assembly in the BOM.
- * Change the phantom item indicator for the phantom assembly in the BOM.
- * Change the special procurement key of the phantom assembly in the BOM.

NEW QUESTION 15

Your client is asking for your advice on material master numbering in SAP S/4HANA. What do you need to consider? Note: There are 2 correct answers to this question.

- * The display template for material numbers applies to all clients.
- * The number of leading zeros for internal numbers is client-specific.
- * The maximum material number length is 40 for external numbers and 18 for internal numbers.
- * In Customizing you can decide by material type whether to use the long material number.

NEW QUESTION 16

Which task list types can have parallel sequences? There are 2 correct answers to this question.

- * Routings (N)
- * Master recipes (2)
- * Rate routings (R)
- * Reference operation sets (S)

NEW QUESTION 17

Where does the system check master data selection settings during the creation of planned orders and production orders? Note: There are 3 correct answers to this question.

- * In the production version
- * In the production order type
- * In the routing
- * In the bill of materials (BOM)
- * In the MRP controller

NEW QUESTION 18

Which of the following functions can be performed when the production order has the status 'Created'; (CRTD)? Please choose the correct answer.

- * A user can trigger material staging via mass processing (transaction COHV).
- * A user trigger printing of shop floor paper manually (transaction CO02).
- * A user trigger material availability check via mass processing (transaction COHV)
- * A user can schedule a background job to release production orders (transaction COOIS).

NEW QUESTION 19

For what production type are production orders used?

- * Period and quantity-oriented production
- * Replenishment controlled by control cycles
- * Process manufacturing processes
- * Discrete manufacturing processes

NEW QUESTION 20

What could be the reason for multiple commitment of individual capacities, where several operations have the same scheduled dates on a resource after capacity planning? Note: There are 2 correct answers to this question.

- * Alternative resources are fully occupied.
- * The Change Planning Direct on indicator is set.
- * The work center has several individual capacities.
- * The planning strategy is infinite.

NEW QUESTION 21

How can you set up the supply source for the SAP Kanban process? Note: There are 3 correct answers to this question.

- * Using purchase orders for external procurement
- * Using stock transfer reservations for stock transfer
- * Using run schedule quantities for in-house production
- * Using purchasing costs for automated source prioritization
- * Using quotations for internal and external procurement

NEW QUESTION 22

You are creating a production order manually. What activities are involved in this process?

There are 3 correct answers to this question.

- * Planning selection
- * Order type determination
- * Actual cost calculation
- * Capacity requirements determination
- * Master data selection

NEW QUESTION 23

What are the possible categories for the Business Partner master data object in SAP S/4HANA?

There are 3 correct answers to this question.

- * Organization
- * Customer
- * Person

- * Vendor
- * Group

NEW QUESTION 24

Why would you use phantom assemblies? Note: There are 3 correct answers to this question.

- * To make the assignment of components easier
- * To simplify the structure of bills of material
- * To reduce the number of changes required in bills of material
- * To increase the number of planning levels
- * To reduce the number of material masters

NEW QUESTION 25

In which customizing activity do you set up automatic routing selection production orders?

Please choose the correct answer.

- * Define order-type-dependent parameter
- * Define scheduling parameters for production orders
- * Define selection profiles
- * Define production scheduling profile

NEW QUESTION 26

Which of the following elements does MRP take into account during net requirement calculation? Note: There are 2 correct answers to this question.

- * Maximum stock level
- * Purchase orders
- * Safety stock
- * Lot size

NEW QUESTION 27

You run MRP for a material that was planned using Demand-Driven Replenishment. Toward which buffer level does the MRP run create a replenishment proposal?

- * Top of Red Base
- * Top of Red
- * Top of Green
- * Top of Yellow
