### Importance of Avaya 71301X Exam to Secure your future

Avaya 71301X Exam is an important certification for the candidates who want to work in the telecom industry. This exam has been designed to test the communication skills of the candidates. It is a good way to secure your future in the telecom industry and it will help you to get better job opportunities in the future as well.

Avaya 71301X Exam also helps you to explore your career options. You can easily find out which area of work you prefer and what type of job suits your personality best. **Avaya 71301X exam dumps** will help you to get the best job in the market. You can also earn money by taking this exam. It is one of the most lucrative certifications in the market and it can help you to increase your salary.

The Avaya 71301X Exam is based on real-time scenarios that will help you understand how you should react in different situations during an emergency call or a conversation with a client. The questions asked in this exam are based on common sense and practical knowledge, so it's not so difficult to answer them correctly.

### The advantages of taking the Avaya 71301X Exam?

The Avaya Aura® Communication Applications Implement Certified Exam (Avaya 71301X) is a certification exam that can help

you gain the skills necessary to become an Avaya Aura certified expert.

The Avaya Aura certification was developed by ETS as a way for organizations to assess their employees' technical knowledge of Avaya communications applications, such as UCM and UCM+.

You should take this exam when you want to improve your career opportunities and earn more money. In addition, you can use this certification in order to enhance your career and get promoted within your company or organization. **Avaya 71301X exam dumps** are updated on regular basis to ensure that you get the latest version of the questions. This certification is a very tough exam, but it is possible to pass it with the help of Avaya 71301X Exam Questions and Answers.

The Avaya 71301X exam is based on the concept of integrated voice communication systems (IVCS). It covers all aspects of IVCS including telephones, handsets, IP phones, fax machines, and other equipment used for voice communications.

**NO.11** To allow trust between Avaya Aura System Manager (SMGR) and Avaya Aura Messaging (AAM), there is a password set when you add the Trusted Server on AAM. This password must match with the password also configured in SMGR.

Which statement about the password in SMGR is true?

- \* It needs to match the Enrollment Password.
- \* It needs to match the admin password used to login to SMGR using a web browser.
- \* It needs to match the Attributes of the Messaging Managed Element in the Inventory.
- \* It needs to match the root password used to login to SMGR command line.

**NO.12** Browse to the location of the snap-in license.

Select the license file and click Open.

Click Accept the License Terms & Conditions and click Install. The system installs the license file.

In the left navigation pane, the system displays the snap-in under Licensed Products. Step 2: Load the snap-in

Step 3: Install the snap-in

After running the Install wizard on Avaya Session Border Controller for Enterprise (SBCE), you added a Public Outside IP address to the B1 interface.

You try to ping this IP address from a PC in the same subnet but it falls.

What would you do first to resolve the issue?

- \* Restart Applications.
- \* Set the Default Gateway router IP address, navigate to the Interfaces and Enable the B1 Interface.
- \* Reboot SBCE.
- \* Navigate to Device Specific Settings > Network Management > Interfaces and Enable the B1 interface.

**NO.13** Which four kinds of services does the TSAPI standard provide for third-party call control over Avaya Aura Communication Manager (CM)? (Choose four.)

- \* receiving notifications of events
- \* controlling specific calls or stations
- \* invoking CM features
- \* performing a remote reboot to the CM server

- \* completing the routing of incoming calls
- \* adding new feature buttons to agent sets

**NO.14** What should be verified before running the `initTM -f` command on the Command Line Interface of Avaya Breeze platform (formerly known as Engagement Development Platform (EDP))?

- \* Verify that Avaya Breeze is configured as a Managed Element in Avaya Aura System Manager.
- \* Verify that an enrollment password is configured on System Manager and that it has not expired.
- \* Verify that a valid Certificate is installed on the Avaya Breeze instance.
- \* Verify that Avaya Breeze is licensed.

**NO.15** Which three functionalities does WebRTC provide? (Choose three.)

- \* NAT / Firewall Traversal
- \* adds click-to-call capabilities from a web application to an Avaya endpoint
- \* Internet-friendly codecs and Privacy
- \* real-time audio and video conferencing

**NO.16** In Avaya Session Border Controller for Enterprise (SBCE) 7.x, which two configuration screens must be configured for Personal Profile Management (PPM) to be successfully downloaded to an Avaya SIP Telephone (AST)? (Choose two.)

- \* PPM Services Mapping Profile
- \* Application Relay
- \* File Transfer
- \* Reverse Proxy

**NO.17** What are the three components of Avaya Aura Messaging (AAM)? (Choose three.)

- \* Messaging Distributor
- \* Application Server
- \* Messaging Store
- \* AxC/Directory
- \* SM100 Module

**NO.18** Which Avaya Breeze Cluster type is the Avaya Aura Presence Services snap-in installed on?

- \* Presence Services
- \* Core Platform
- \* General Purpose
- \* IM\_Presence

**NO.19** The Avaya WebRTC solution uses the web intensively to make media calls from a standard web browser in the internet, into internal and secure communication premises in the enterprise.

Which statement about security between the Enterprise-edge and those standard Web browsers in the internet is true?

- \* A trust relationship based on certificates must be built to make WebRTC work.
- \* No trust relationship exists between enterprise edge security and web browsers; therefore, the security strategy is based on an Authorization Token instead.
- \* There must be a VPN connection between the Web Browser and the Enterprise-edge to build a WebRTC link.
- \* WebRTC only works within the Enterprise network. External Web Browsers must connect through an Avaya Session Border Controller for Enterprise (SBCE) via a SIP trunk.

**NO.20** WebRTC is used for which type of calls?

- \* video calls only
- \* calls originated from internal web browsers only

- \* calls originated from external web browsers only
- \* calls originated from internal and external web browsers

**NO.21** The provisioning script automatically runs as part of the first boot-up of the Avaya Session Border Controller for Enterprise (SBCE). During this process you assign the Management IP address to the SBCE. You browse to the Element Management System (EMS) to continue to install the SBCE.

On the System Management > Devices web page, which status does the SBCE display before the Install link is clicked?

- \* Ready
- \* Provisioned
- \* Registered
- \* Commissioned

**NO.22** In Avaya Session Border Controller for Enterprise (SBCE), what is the default state of an Interface?

- \* Deployed
- \* Enabled
- \* Disabled
- \* Active

**NO.23** On Avaya Session Border Controller for Enterprise (SBCE), which statement about how to examine messages with Wireshark is true?

- \* You have to start and stop the .pcap file using command line.
- \* You can start and stop a Packet Capture in the EMS web GUI and then you can open the .pcap file with Wireshark.
- \* Wireshark runs directly on Avaya Session Border Controller for Enterprise (SBCE).
- \* They cannot be examined on this version.

**NO.24** To route calls to Avaya Aura Messaging (AAM), which routing strategy is used by Avaya Aura Session Manager (SM)?

- \* Automatic Route Selection (ARS)
- \* Automatic Alternate Routing (AAR)
- \* Network Routing Policies (NRP)
- \* Registry Routing

**NO.25** You are setting up the SIP connection between Avaya Aura Messaging (AAM) and the

Avaya Aura Core, and the information you have entered for the Far-end connection is:

What should you conclude from all this information?

- \* The connection cannot work because 5061 is not the Well-known port corresponding to TLS by standard.
- \* There will be conflicts in the TLS connections given that 5061 is a well-known port that other Endpoints and Servers use within the same network.
- \* A Security Certificate from the same Certificate Authority as the other Avaya Aura components, must be installed on the AAM Server to guarantee successful TLS Connections.
- \* The IP address is wrong because its range does not correspond to a valid TLS-compatible IP address.

**NO.26** For an Avaya SIP telephone, working as a Remote Worker via the Avaya Session Border Controller for Enterprise (SBCE), which IP address should be configured in the Server List of the one-X Communicator?

- \* the SBCE Internal Interface allocated for Mobile Workspace Endpoint
- \* the SBCE External Interface allocated for Mobile Workspace Endpoint
- \* the Internal Avaya Aura Session Manager SM100 IP Address
- \* the Avaya Aura Session Manager External Interface allocated for Mobile Workspace Endpoints.

**NO.27** Which statement describes Cross-Origin Resource Sharing (CORS)?

- \* It allows for signaling-groups to be used by more than one trunk-group.
- \* It is a W3C specification that allows cross-domain communication from the browser.
- \* It is making DSP resources available regardless of the originating location of a call.
- \* It is a network setup by which an Avaya Aura Media Server (AAMS) can be used by more than one Avaya Aura Communications Manager (CM).

**NO.28** Which configuration must be completed before configuring a TSAPI link on Avaya Aura Application Enablement Services (AES)?

- \* A CTI link must be configured on Avaya Aura Communication Manager (CM) first.
- \* A Switch Connection must be configured on Avaya Aura Application Enablement Services (AES) first.
- \* A signaling-group must be configured on Avaya Aura Communication Manager (CM) first.
- \* A CTI-user must be configured on Avaya Aura Application Enablement Services (AES) first.

**NO.29** You are creating a SIP Entity for Avaya Aura Engagement Development Platform &#8211; EDP / Avaya Breeze.

What do you have to enter in the field labeled FQDN or IP Address?

- \* the Management IP-Address or FQDN of the Avaya Breeze platform.
- \* the SM100 IP-address or FQDN of the Avaya Breeze platform
- \* the IP-Address or FQDN of Core Platform Cluster
- \* the IP-Address or FQDN of general Purpose Cluster

**NO.30** What identifies that the Avaya Breeze server is using Identity Certificates that have been signed by Avaya Aura System Manager (SMGR)?

- \* if the Issuer Name states &#8220;O=AVAYA, OU=MGMT, CN= System Manager CA&#8221; for the Security Module SIP Identity Certificate
- \* if the replication status is showing &#8216;Synchronized&#8217; with a green background color
- \* if a successfully installed WebRTC snap-in is used
- \* if the Entity Link between Avaya Aura Session Manager (SM) and Avaya Breeze server is up

**NO.31** In Avaya Aura System Manager, how is Avaya Aura Messaging (AAM) added to the list of Managed Elements?

- \* It is added when you configure the AAM SIP Entity in SMGR.
- \* It is automatically added during the enrollment process.
- \* It can only be manually added.
- \* It is automatically added using `initTM -f` command on the Command Line Interface of AAM.

**NO.32** Before SIP Trunking configuration can begin, which state must the Avaya Session Border Controller for Enterprise (SBCE) be in?

- \* Registered
- \* Provisioned
- \* Commissioned
- \* Ready

**NO.33** You are starting the process to create a server certificate so it can be installed in the Avaya Session Border Controller (SBC).

What must be done before creating a server certificate for SBC?

- \* Generate a Certificate Signing Request (CSR) in SBC.
- \* Run `initTM -d` from SBC CLI.
- \* Add End Entity in Session Manager.

\* Download a CA PEM file from System Manager.

**NO.34** What are three ways of accessing Avaya Aura Application Enablement Services (AES) to perform administration? (Choose three.)

- \* with an Open X.11 terminal window
- \* with web access
- \* with remote access using Rlogin
- \* with local access using a system console
- \* with remote access using SSH
