

[Oct-2022 Updated SAP C_IBP_2108 Dumps - PDF & Online Engine [Q39-Q54]

[Oct-2022] Updated SAP C_IBP_2108 Dumps & PDF & Online Engine
C_IBP_2108.pdf - Questions Answers PDF Sample Questions Reliable

NO.39 What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- * Define which phase-in and phase-out profiles can be used within Lifecycle Planning
- * Define which key figure can be used as sales history for new products
- * Define at least one attribute of the planning area which represents the Product ID
- * Define which is the attribute ID for the Lifecycle profiles

NO.40 You are reviewing the master data types for supply planning. Which master data types are compound master data types?

Note: There are 2 correct Answers to this question.

- * LOCATIONFR
- * SOURCELOCATION
- * SOURCECUSTOMER
- * SOURCEPRODUCTION

NO.41 The Analytics Advanced app allows you to work with different types of charts. What can be the origin of the charts you can work with?

- * SAP IBP VBA Add-in template
- * Process Templates
- * Custom Alerts
- * Dashboards Advanced

NO.42 Which of these conditions must be met to create a Local Member key figure?

- * A key figure is created in the Planning Area app.
- * Use Excel Cell References in Report Editor is selected.
- * A key figure is selected in the Key Figures tab in the Microsoft Excel add-in.
- * Activate Local Member Recognition is selected.

NO.43 What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note:

There are 2 correct Answers to this question.

- * Configure at most two input key figures on the same planning level in a key figure calculation.
- * Assign the compound master data type and its component master data types.
- * Specify a planning horizon in the planning area for each level of the assigned time profile.
- * Configure at least one calculated key figure for the planning area.

NO.44 While modeling for a large machine with high capital needs, you need it to run cost effectively with minimum utilization, even if it means producing more than demand. Which solution would apply to this scenario? Note: There are 2 correct Answers to this question.

- * Capacity leveling will be possible for production and storage resources.
- * Excess stock can be generated and will need to be staged in an overflow warehouse.
- * Enough demands can be pulled forward and pull production will occur.
- * Balance can be achieved between excessive prebuild and minimum utilization by incorporating violation costs.

NO.45 Which of the following functional areas are included in the out-of-the-box SAP Integrated Business Planning application for sales and operations? Note: There are 3 correct Answers to this question.

- * Executive review
- * Demand-driven materials requirement planning
- * Rough-cut supply planning
- * Consensus demand planning
- * Finite resource capacities planning

NO.46 You want to set up demand sensing to analyze demand changes in execution or close to execution windows. Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

- * At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.
- * The result generates sensed demand data at the monthly time granularity for the full time horizon.
- * Set up the forecast model to be executed at product-location level.
- * It is mandatory to load historical lag-based snapshot data.

NO.47 You are working on a mid-range plan that spans the seasonal peak and you are evaluating the need for additional crewing. Which of the following parameters can you model to plan production with extra shift(s)?

- * Incremental production values
- * Capacity expansion with additional costs
- * Production source validity at the start of seasonal peak
- * Adjusted production interactive values

NO.48 Which of the following approaches could you take to reduce run times of an optimizer? Note: There are

2 correct Answers to this question.

- * Use a subnetwork ID to reduce the size of the problem.
- * Split into multiple planning areas to support weekly vs. daily planning needs.
- * Avoid using telescopic time buckets.
- * Increase the use of incremental lot size beyond the frozen horizon.

NO.49 When you promote calculated and approved inventory parameters from SAP IBP for inventory, what other IBP modules can be receiving them? Note: There are 2 correct Answers to this question.

- * SAP IBP for sales and operations
- * SAP IBP for response and supply
- * SAP IBP for demand
- * DDMRP

NO.50 SAP is transitioning IBP customers to the new process of export/import. What are some of the features of this new process?

Note: There are 2 correct Answers to this question.

- * You can choose to import only some of the items that were exported.
- * You can move a transported item from one collection to another.
- * You can create a collection of items and export it.
- * You can export from a planning area that is on a different release.

NO.51 Which of the following are functions of SAP IBP for demand? Note: There are 3 correct Answers to this question.

- * Detailed statistical analysis of demand data using the supply chain algorithm library
- * Embedded, on-the-fly demand analytics
- * Demand sensing of demand data using the supply chain algorithm library
- * Detailed statistical analysis of demand data using predictive analytics tools
- * Demand sensing of demand data using predictive analytics tools

NO.52 You are creating advanced copy operators as part of an SAP IBP solution that is being implemented.

What do you need to be aware of when defining data transfer? Note: There are 2 correct Answers to this question.

- * Specifying target key figure is mandatory.
- * Specifying target key figure that is time independent is possible.
- * Specifying source key figure is mandatory.
- * Selecting by attribute with option '‘contain’ is possible.

NO.53 Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

- * Profit maximization
- * Delivery maximization
- * Resource maximization
- * Production maximization

NO.54 Which of the following stages can be modeled using scenarios from the S&OP planning cycle? Note:

There are 2 correct Answers to this question.

- * Demand sensing stage
- * Data input review for inventory
- * Demand review
- * Demand-supply balancing

SAP C_IBP_2108 Exam Description:

The "SAP Certified Application Associate - SAP IBP for Supply Chain (2108)" certification exam verifies that the candidate possesses the basic knowledge in the area of the SAP supply chain planning. This certificate proves that the candidate has a basic overall understanding within this consultant profile of the industry solutions, and can implement this knowledge practically in projects under guidance of an experienced consultant. It is recommended as an entry-level qualification to allow consultants to get acquainted with the fundamentals of SAP Integrated Business Planning. Please note that this 2105 version of the exam takes part in the Stay Current with SAP Global Certification program. Once you pass this version of the exam, make sure that you start your stay current process. You will be required to take the quarterly stay current assessment for all subsequent SAP IBP releases via the SAP Learning Hub starting with the 2108 release to maintain your SAP IBP consultant certification status and badge. In order to participate in the stay current program and access the stay current enablement and assessment, you will need at minimum an SAP Learning Hub, edition for IoT and Digital Supply Chain subscription.
