Real C-FIORDEV-22 are Uploaded by **ValidExam** provide **2022** Latest C-FIORDEV-22 Practice Tests Dumps.
All C-FIORDEV-22 Dumps and SAP Certified Development Associate - SAP Fiori Application Developer Training Courses Help candidates to study and pass the SAP Certified Development Associate - SAP Fiori Application Developer Exams hassle-free!

SAP C-FIORDEV-22 Certification Exam Topics:
Topic AreasTopic Details, Courses, Books**SAP Business Technology Platform (SAP BTP) and SAP Business Application Studio 8% - 12%**Describe the SAP BTP and the Prototyping, Development, Packaging, Deployment, and Extensibility tools available in SAP Business Application Studio.   UX400 (SAPUI5 1.84)   UX403 (SAP FIORI 3.0)   **SAP Fiori Strategy, Standards and Guidelines 8% - 12%**Define SAP Fiori Key principles, SAP Fiori application types, elements of User Experience Design, the concept of Design Thinking, the Problem Space and Solution Space phases in the Design Thinking process, and implement SAP Fiori UIs using the SAP Fiori Design Guidelines.   UX400 (SAPUI5 1.84)   UX403 (SAP FIORI 3.0)   **SAP Fiori Launchpad Configuration 8% - 12%**Describe the configuration of SAP Fiori Launchpad, Launchpad navigation.   UX100 (SAP S/4HANA 2020)   UX402 (SAP FIORI 3.0)   **Deployment & Testing > 12%**Deploy an application on an ABAP Server, an application on the SAP BTP. Write unit tests, unit test with QUnit, create a QUnit test scenario, apply integration a test with OPA5, and create an OPA5 test scenario.   UX410 (SAPUI5 1.71)   UX410 (SAPUI5 1.71)   **SAPUI5 Foundations > 12%**Explain MVC and application architecture, the concept of modules, implement controls using the SAPUI5 framework (standard and custom), and

bind Data to a UI5 Control; describe and work with key responsive design controls, translatable texts, app descriptor, aggregation binding, dialogs and fragments, expression binding, custom formatting, filtering, grouping and sorting; work with diagrams. UX400 (SAPUI5 1.84) **OData and Advanced Data Handling 8% - 12%**Register OData service at frontend server, describe an OData model and how to access backend data by way of the OData-specific data binding feature; implement data binding using XML data, describe the OData write-support, OData deep inserts, and perform tasks associated with adding, updating and deleting backend data from within an SAPUI5 application, and implement a Facet Filter control. UX410 (SAPUI5 1.71)

Q16. Which of the following are features of the SAPUI5 SDK? Note: There are 2 correct answers to this question.
* Is a subset of OpenUI5
* Allows the usage of the jQuery library
* Keyboard interaction support and accessibility features
* Provides an interface to Web Dynpro

Q17. In the data in the screenshot, you want to display the List of Companies in the Americas region.Which binding option do you use for the X, Y, and Z values in the view?

```
1  View:
2      <List id="myList"  items="{X}"
3          headerText="Companies" >
4          <DisplayListItem label="{Y}" value="{Z}" />
5      </List>
6
7  Data:
8      var data = {
9              regions: [
10                 {
11                     name: "Americas",
12                     companies : [
13                         {
14                             name : "Acme Inc.",
15                             city: "Belmont"
16                         },
17                         {
18                             name : "Beam Hdg.",
19                             city: "Hancock"
20                         }
21                     ]
22                 }
23             ]
24         };
25
```

* X: /regions/0/companies Y: companies/0/name Z: companies/0/city
* X: /regions/companies Y: companies/name Z: companies/city
* X: /regions/companies Y: name Z: city
* X: /regions/0/companies Y: name Z: city

Q18. You develop an SAPUI5 app that can be extended. To allow your customer to customize notifications, you set up a hook method.What activities are required to set up a hook method?Note: There are 3 correct Answers to this question.
* Modify the bootstrap option to allow multi-layer extensions of the custom code.
* Identify a strategic location in the controller for the customized code.
* Define a new function name ensuring it is reserved for the extension.
* Create a .js file in the Util folder to allow the customer to add custom code.
* Add a code snippet to check if the method exists and execute it.

Q19. Which elements are part of a list report?Note: There are 2 correct Answers to this question.
* Cards
* Visual filters
* Application header
* Save as tile button

Q20. What are the limitations of OPA5 test?Note: There are 2 correct Answers to this question.
* No screen capturing
* No automated test creation
* No remote test execution
* No access to JavaScript functions

Q21. Why does SAP Fiori use an intent-based navigation?Note: There are 2 correct Answers to this question.
* To support cross-app navigation
* The concrete app targets can be deployed separately
* Interdependent targets must be deployed in a single transport request
* To provide different results to different users with the same intent

Q22. What are the advantages of Local Annotations Over SADL-based Annotations?Note: There are 2 correct Answers to this question.
* Can handle Complex annotations which is not a bound to a single field or entity
* Can Override the CDS based Annotations
* Local Annotations are more reusable as compared to SADL based annotations
* All the Framework-Specific Annotations available as a part of CDS views are also available as a part of Annotation Modeler, which makes it highly flexible

Q23. Where are the themes saved for the SAP Fiori launchpad?
* In the theme repository
* In the theme data center
* In the UI theme designer tool
* In the bootstrap

Q24. Which of the following activities allows you to send commits from your local branch in your Git repository to the remote repository?
* Save
* Clone
* Push
* Commit

Q25. What is the required content in the Component.js file for an extension project?Note: There are 2 correct Answers to this question.
* The controller IDs
* The namespace of the parent app
* The link to the parent app
* The customizing section

Q26. Why do you explore the Problem Space in detail during a Design Thinking workshop?
* To understand user needs
* To save costs in the evaluation phase
* To validate solution ideas

* To create desirable solutions

Q27. Which information is included in the SAPUI5 app’s manifest.json file?Note: There are 3 correct Answers to this question.
* SAPUI5 dependencies
* App ID, Name, and Version
* Referenced data sources
* Localization keys
* Client side data-models

Q28. What is the correct HTTP request method that is required to modify an ODATA resource?
* CHANGE
* PUT
* POST
* UPDATE

Q29. Which file can you use to configure internal navigation for List Report and Object Page templates?
* index.html file
* manifest.json file
* OData annotation file
* vocabulary.xml file

Q30. You want to create a business catalog for all employees that contains a standard SAP Fiori app. How would you do this?
* Reference the tile from Odata metadata
* Reference the tile from a Technical Catalog provided by SAP
* Reference the tile from a SAP Business Group
* Reference the tile from a SAP Business Catalog

Q31. In the source code below, which of the following locations must reference the extension point?

* Neo-app.json
* Componente.js
* EmployeData.view.xml
* EmployeData.controller.js

Q32. Which of the following are features of the SAPUI5 SDK?Note: There are 2 correct Answers to this question.

* Responsiveness across browsers on non-mobile devices only
* Interface for Web Dynpro
* Full translation support
* Feature-rich UI controls for handling complex UI patterns

Q33. As which app type does SAP Business Application Studio deploy an SAPUI5 app to the ABAP server?

* OpenUI5
* ABAP
* BSP
* HTML5

Q34. Which tile types can you use to display real-time data values that are read from an OData service? Note: There are 2 correct answers to this question.

* App Launcher – Dynamic tile
* App Launcher – Static tile
* News tile
* KPI-based tile

Q35. Which of the following annotations would you use for a List Report Page? Note: There are 2 correct answers to this question.

* Use @UI.Iineitem.importance annotation to determine in which devices the field is displayed.
* Use @UI.selectionField annotation to define a fuzzy search field
* Use @Search.defaultSearchElement annotation to define input fields with value help.
* Use @UI.hidden annotation to hide the fields that are not to be displayed on a list report

Q36. Which annotations are needed in a CDS View to create an Analytic Card in an Overview Page?Note:

There are 2 correct Answers to this question.

* @UI.Chart
* @UI.identification
* @UI.dataPoint.responsible
* @UI.lineItem
