

## PEGAPCSSA86V1 Exam Info and Free Practice Test All-in-One Exam Guide Mar-2023 [Q36-Q60]

### PEGAPCSSA86V1 Exam Info and Free Practice Test All-in-One Exam Guide Mar-2023 Pass Pegasystems PEGAPCSSA86V1 Actual Free Exam Q&As Updated Dump Mar 27, 2023 QUESTION 36

Which two of the following prerequisites would you choose to create a branch rule for parallel development? (Choose Two)

- \* Give team members access to the team application
- \* Circumstance the original rule
- \* Create a team application
- \* Save a copy of the original rule into the base ruleset

#### QUESTION 37

What is the difference between using the Call and Branch methods in an activity step to invoke other activities?

- \* Branch overrides the security restrictions of the called activity allowing you to easily test code; it will not run in production.
- \* Branch creates a new thread to allow asynchronous processing, while Call runs in the thread from it was invoked.
- \* Call provides more robust debugging capability than Branch, while Branch provides better run-time performance.
- \* Call returns to the originating activity, while Branch skips the remainder of the originating activity.

#### QUESTION 38

You are troubleshooting a performance issue with a user interaction that exceeds the maximum time of five seconds. The elapsed time shown in the performance report indicates a total of two seconds.

Which tool do you use to determine what is adding the additional three seconds to the performance measure?

- \* Performance Profiler
- \* Database Trace
- \* Log Analyzer
- \* System Management Application

### QUESTION 39

Select two actions can you do with the Pega API? (Choose Two)

- \* Create a new case
- \* Add a property to a data class.
- \* Access data from a data page
- \* Update a decision table.

### QUESTION 40

Which two types of records does the External Database Table Class Mapping wizard create? (Choose Two)

- \* The Database data instance
- \* The Property rules used to map to the table columns
- \* The Database Table data instance
- \* The Connect SQL rule used to retrieve the data

### QUESTION 41

A class group is used to.

- \* identify a layer of the Enterprise Class Structure
- \* combine related properties by usage
- \* assign work to a specific group of users
- \* store data from different child classes in a single table

### QUESTION 42

You want operators in two separate units to be able to perform work routed to either unit.

Which configuration supports this requirement?

- \* On each operator's record, associate the operator with both units.
- \* On each operator's record, associate the operator with the same work group.
- \* On the work group record, associate the operators with the work group.
- \* On each unit record, associate both operators with each unit.

### QUESTION 43

In the first step in a case type, the user compares data on a form to the data on a customer account. If the data matches, the case is resolved. If the data does not match, the user advances the case to update the account.

Management only wants a record of the cases that update an account .

What two configuration options do you use to implement this requirement? (Choose two.)

- \* Add a Persist Case shape after the first step.

- \* Apply a when condition to the first step to persist only cases requiring updates.
- \* Configure the starting flow to instantiate the case type as a temporary case.
- \* Configure the first step to instantiate the case type as a temporary case.

#### QUESTION 44

The customer, a medium size toy maker, wants to fulfill orders received during the peak season in December and process them in batches multiple times a day.

How do you implement this use case?

- \* Create a queue processor that can process orders received by the company.
- \* Create one scheduled job and select its run schedule as multiple times a day.
- \* Create batches of orders and send each batch for processing when it gets full.
- \* Create scheduled jobs, one for each run, that can process accumulated orders.

#### QUESTION 45

Which two rule types can you mark as a relevant record? (Choose two.)

- \* Property
- \* Decision table
- \* Skin
- \* Section

#### QUESTION 46

The keyword Primary is a prefix to the value in the current case. You have added weighted conditions to duplicate case search in a case type .

How do you configure the condition fields to differentiate between fields on the current case and fields on the existing case?

- \* Prefix the keyword Primary to the value used in the current case.
- \* Suffix the keyword Primary to the value used in the current case.
- \* Prefix the keyword Primary to the value used in the existing case
- \* Suffix the keyword Primary to the value used in the existing case

#### QUESTION 47

Management reports that have an unacceptably large number of cases are incorrectly identified as duplicate cases .

Which two approaches could you use to modify the duplicate case search process so that it

produces fewer invalid duplicates? (Choose Two)

- \* Add a Persist Case step after the Duplicate Search step.
- \* Adjust the condition weights.
- \* Adjust the threshold value.
- \* Do not use a must match condition.

#### QUESTION 48

Which tool do you use to identify missing alternate text for an image?

- \* Live UI
- \* Accessibility Inspector
- \* Tracer
- \* Clipboard tool

#### QUESTION 49

Several development teams work on different enhancements. The release date for each enhancement is uncertain.

Which two options allow each team to keep its work separate? (Choose two.)

- \* Set up branch ruleset for each team.
- \* Create a new application for each team.
- \* Create a new ruleset version for each team.
- \* Create a production ruleset for each team.

#### QUESTION 50

When a process is configured to create temporary cases, which of the following occurs when a user creates a case?

- \* The system creates an object ID and stores the case in the database.
- \* Data is stored in the database.
- \* The system stores case data on a clipboard page specifically for temporary cases.
- \* The case is stored in memory.

#### QUESTION 51

A new system architect questions the value of allowing attachments to cases .

What would be your best response?

- \* Pega provides attachment functionality out-of-the-box, so it must be important.
- \* Attachments can provide additional information required to process a case.
- \* Adding attachments to cases is the method of choice for storing case documentation.
- \* Case flow is dependent on attachments because attachments provide information essential to a case.

#### QUESTION 52

Identify three true statements about accessing databases through external classes (Choose Three)

- \* External classes require a Pega-generated composite key.
- \* External classes do not contain the pZinsKey property.
- \* External classes cannot belong to a class group.
- \* External classes contain a BLOB for faster processing.
- \* External classes map Pega properties to database columns.

#### QUESTION 53

Which two design configurations limit the need for horizontal scrolling when an application is used on a mobile device? (Choose two.)

- \* Hide noncritical columns.
- \* Use grid layouts rather than repeating dynamic layouts to display tabular data.
- \* Configure UI controls to use native controls on mobile devices.
- \* Set the width for layouts in percentages.

#### QUESTION 54

Which three statements are valid about configuring Pega Web Mashups? (Choose Three)

- \* Customize the display size of your mashup through the data-page-resizetype attribute.
- \* Keep the original names of default actions in mashup code to prevent security risks.
- \* Add a list of trusted domains in your applications that you want to use the mashup in.
- \* Use the integration wizard to generate mashup code for use in external systems.
- \* Only create one DIV element in the hosting web page per Pega gadget.

#### QUESTION 55

The reason you want to run a process immediately before taking performance readings is\_\_\_\_\_.

- \* to train the system which process we're going to measure
- \* to make sure there are no bugs in the system
- \* to allow the rules to assemble
- \* to make sure we know which buttons to click so we can be quick

#### QUESTION 56

Which two options do you consider when creating a pre-processing data transform? (Choose Two)

- \* The potential reuse of the flow action
- \* The effect if the flow action is reloaded.
- \* The timing of the commit for the flow action.
- \* The security setting for the flow action.

#### QUESTION 57

A user reports that an application takes five seconds to complete a step and present the next step in a process.

Which tool allows you to gather and analyze performance data for the form submission?

- \* Performance Profiler
- \* Performance Analyzer (PAL)
- \* Database Trace
- \* Tracer

#### QUESTION 58

Which two data elements can be used as an attribute for an access control policy? (Choose Two)

- \* Appointment date
- \* Number of dependents
- \* Password string
- \* Encrypted bank account number

#### QUESTION 59

You are working on an update to an application which only affects some rules for a certain case type. The customer has requested that a patch update the application.

How do you create the new ruleset version?

- \* Use the Lock & Roll functionality to lock the current ruleset and increment the ruleset version.
- \* Use the Ruleset Maintenance wizard to skim the relevant rulesets to copy the highest version of existing rules to the new version.
- \* Create a branched ruleset, then copy the affected rules into the new branched ruleset.
- \* Use the Ruleset Maintenance wizard to merge the existing rules in the relevant rulesets to the new version.

## QUESTION 60

University admission application cases automatically advance in the case life cycle if the applicant's standardized test scores are above a certain threshold. The threshold is determined each year based on the provided national average score.

Which two configurations, when applied together, support this requirement? (Choose Two)

- \* Configure a process with a decision shape that continues if the TestThreshold Configuration setting is less than the applicant's test score.
- \* Configure a TestThreshold Configuration setting with the national average for the test score threshold.
- \* Configure a TestThreshold Configuration setting that calculates the national average for the test score threshold.
- \* Configure a process with a decision shape that continues if the TestThreshold Configuration setting is greater than the applicant's test score.
