

## Check the Available PSE-Strata-Associate Exam Dumps with 37 QA's UPDATED 2023 [Q13-Q34]

**Check the Available PSE-Strata-Associate Exam Dumps with 37 QA's UPDATED 2023 Download PSE-Strata-Associate Exam Dumps Questions to get 100% Success in Palo Alto Networks NO.13** A Human Resources (HR) application has the URL of <https://hr.company.com:4433/>.

How should the `Service` column of the Security policy be set to match and permit this application?

- \* Define and then select a new custom Transmission Control Protocol (TCP) service with port 4433.
- \* Edit `service-https` to use port 4433.
- \* Set to `service-http`.
- \* Set to `application-defaults`; which will locate and match the HR application.

**NO.14** The ability of a Next-Generation Firewall (NGFW) to logically group physical and virtual interfaces and then control traffic based on that grouping is known as what?

- \* LLDP profiles
- \* security zones
- \* DHCP groups
- \* security profile groups

**NO.15** Which of the following statements applies to WildFire Public Cloud verdicts?

- \* They are unique to the affected Next-Generation Firewall (NGFW).
- \* They are shared globally with all WildFire customers.
- \* They must be manually downloaded from the WildFire portal.
- \* They are automatically shared with third-party firewall vendors.

**NO.16** The Security Operations Center (SOC) has noticed that a user has large amounts of data going to and coming from an external encrypted website. The SOC would like to identify the data being sent to and received from this website.

Which Secure Sockets Layer (SSL) decryption method supported by Palo Alto Networks would allow the SOC to see this data?

- \* Forward Proxy
- \* Web Proxy
- \* Certificate Proxy
- \* Inbound Proxy

**NO.17** Which architecture allows a Palo Alto Networks Next-Generation Firewall (NGFW) to achieve high performance with all security features enabled?

- \* single-pass parallel processing
- \* dual-pass processing
- \* multi-core processing
- \* parallel-pass single processing

**NO.18** Which three of the following are features of the Palo Alto Networks Next-Generation Firewall (NGFW) that differentiate it from a stateful inspection firewall? (Choose three.) Select 3 Correct Responses

- \* Login-ID
- \* User-ID
- \* App-ID
- \* Network-ID
- \* SSL/SSH Decrypt

**NO.19** Implementation of which PAN-OS feature improves visibility and prevention of malware?

- \* Anti-Spyware profiles
- \* Data Filtering profiles
- \* Decryption profiles
- \* Antivirus profiles

**NO.20** A customer has enabled the Threat Prevention subscription on their Palo Alto Networks Next-Generation Firewall.

How will the performance of the firewall be affected if the customer also enables both WildFire and User-ID?

- \* The maximum throughput performance will be reduced, but the impact will vary based on the firewall model being used.
- \* Enabling User-ID will have no additional performance impact, but enabling WildFire will reduce throughput.
- \* There will be no additional performance impact to the firewall, and throughput will remain the same, regardless of firewall model.
- \* Enabling WildFire will have no additional performance impact, but enabling User-ID will reduce throughput.

**NO.21** Which section of a Security Lifecycle Review (SLR) report summarizes risk exposure by breaking down a detected attack on the network?

- \* Advanced URL Filtering Analysis
- \* SaaS Applications
- \* Threats at a Glance
- \* Applications that Introduce Risk

**NO.22** Using a comprehensive range of natively-integrated subscriptions and inline machine learning (ML), what does a Next-Generation Firewall (NGFW) use to prevent known and unknown threats in real time?

- \* Cloud Native Security Platform (CNSP)
- \* Cloud Security Posture Management (CSPM)
- \* Cloud Identity Access Management (CIAM)
- \* Cloud Delivered Security Services (CDSS)

**NO.23** An administrator wants to deploy a pair of firewalls in an active/active high availability (HA) architecture.

Which two deployment types are supported in this circumstance? (Choose two.) Select 2 Correct Responses

- \* Layer 3
- \* TAP mode
- \* Virtual Wire
- \* Layer 2

Explanation

<https://docs.paloaltonetworks.com/pan-os/10-2/pan-os-admin/high-availability/ha-concepts/hamodes#id15a9d29>

**NO.24** Which Palo Alto Networks product offers a centrally managed firewall update process?

- \* SD\_WAN
- \* Prisma SaaS
- \* Panorama
- \* WildFire

**NO.25** Which Next-Generation Firewall (NGFW) deployment model allows an organization to monitor traffic during evaluations without interruption to network traffic?

- \* Layer 2
- \* TAP mode
- \* virtual wire
- \* Layer 3

**NO.26** Which two of the following are benefits of the Palo Alto Networks Zero Trust architecture? (Choose two.) Select 2 Correct Responses

- \* tighter access control
- \* increased detection of threats and infiltration
- \* more network segments
- \* cloud-based virtual private network (VPN)
