Platform-App-Builder Exam Dumps Contains FREE Real Questions from the Actual Exam

The Salesforce Platform-App-Builder Exam is a certification program that validates a professional's skills and knowledge of building custom applications on the Salesforce Platform. The certification is designed for individuals who have a thorough understanding of Salesforce's declarative features and who can design, build, and implement custom applications using the Salesforce Platform. The certification is ideal for developers, administrators, and business analysts who want to demonstrate their proficiency in developing applications on the Salesforce Platform.

Q12. A junction object has two Master-Detail relationships. What happens to a junction object record when either associated master record is deleted?

- * The record is deleted and placed in the recycle bin.
- * The master record can't be deleted if it has a child record.
- * The look-up field on the junction object record is cleared.
- * The record is permanently deleted and can't be restored.

Q13. You have created a workflow rule to send an e-mail in your configuration sandbox.

For some reason it's not working, what should you double check? (Choose two.)

- * Look at the system audit trail.
- * HTML does not work in sandbox, make sure your e-mail has no HTML.
- * You have the correct e-mail address.
- * Check the deliverability settings.

Q14. An app builder wants to show groups as the last navigation menu item in the Salesforce mobile app. However, the app builder is not able to select groups as one of the items on the drop-down menu. What could cause this?

- * Groups is showing up in the recent section and not in the navigation menu
- * Groups is not included in the selected list for the navigation menu
- * Groups is included in the smart search items but not on the navigation menu
- * Groups cannot be the last item in the navigation menu.

Q15. What is true about validation rules? (Choose all that apply.)

- * When one validation rule fails, Salesforce continues to check any additional validation rules on that field or any other field on the page and displays all appropriate error messages at once.
- * Campaign hierarchies follow validation rules.
- * Validation rules are only enforced during lead conversion if validation and triggers for lead conversion are enabled in your organization.
- * Salesforce runs validation rules before creating records submitted via Web-to-Lead and Web-to-Case, and only creates records that have valid values.

Q16. A user has requested a field that counts the number of child records associated with a custom object. These custom objects have a lookup relationship between each other.

Which feature would best accomplish this requirement?

- * Apex Trigger
- * Roll-Up Summary Field
- * Lightning Process Builder
- * Visual Flow

Process builder can't count.

Q17. Which two objects can be members of a Campaign? (Choose two.)

- * Opportunity
- * Account
- * Lead
- * Contact

Q18. An app builder needs to create new automation on an object.

What best practice should the app builder follow when building out automation?

- * One Workflow rule per object.
- * One Flow per object.
- * One invocable process per object.
- * One record change process per object.

Q19. Sales reps at Universal Containers use Salesforce on their mobile devices. They want a way to add new contacts quickly and then follow up later to complete the additional information necessary.

What mobile solution should an App Builder recommend?

- * Customize the mobile menu to move Contacts to the top.

- * Build a global action to create Contacts.
- * Add a compact layout to Contacts.
- * Use Path and set pre-defined values

Q20. Cloud Kicks wants to start tracking how many shoe subscriptions have been sold for each shoe catalog. A master-detail relationship exists between the Subscription__c and the Shoe__c objects.

Which type of field should an app builder create?

- * Roll-up summary field
- * Lookup field
- * Master-detail relationship field
- * Number field

Q21. An App Builder at UVC would like to prevent users from creating new records on an Account related list by overriding standard buttons. Which two should the App Builder consider before overriding standard buttons?

- * Standard buttons can be changed on lookup dialogs, list views, and search result layouts
- * Standard buttons can be overridden with a Visualforce page
- * Standard buttons that are not available for overrides can still be hidden on page layouts
- * Standard buttons can be overridden, relocated on the detail page, and relabeled

Q22. Universal Containers wants to track installation information once it container has been purchased on a custom object. Sales reps should have visibility of all the installation with their opportunities.

visibility of all the installations associated with their opportunities.

What kind of relationship should this new object have to the Opportunity?

- * Lookup
- * Hierarchical
- * Master-Detail
- * Many to Many

Q23. In which of these scenarios is ETL a better choice than Lightning Connect?

- * You need to create or update the external data in addition to reading it.
- * You need the external data to follow the sharing rules defined for your organization.
- * You want to generate reports and charts from the external data.
- * All of the above.

Explanation/Reference:

Q24. Ursa Major Solar's sales team has been struggling to enter data on mobile since rollout; the team dislikes scrolling through all of the fields to input only the necessary data.

How could the app builder solve this with minimal impact to desktop users?

- * Filter components by device using Form Factor.
- * Reorder the fields to make sense for the reps when in the field.
- * Update the training documentation with better screenshots.
- * Deselect the phone radio button on the Lightning record page assignment.

Q25. On the Account Lightning record page, users need to see ten fields and the ability to sort and wrap text on their Related Lists.

What Related List type would the app builder select for the Related List Lightning component?

- * Enhanced List
- * Basic List
- * ListView
- * List Class

Q26. UVC wants to optimize routes for its traveling service personnel. What is recommended solution?

- * Configure routing options in a custom object
- * Use geolocation fields with Distance and Geolocation formulas
- * Configure Territory hierarchy and rules for routes based on territory
- * Use an AppExchange partner product

Q27. The app builder has just created a Visual Workflow for the VP of Service.

Which two Flow be accessed by users? (Choose two.)

- * Custom Button
- * Quick Action
- * Visual Workflow Launcher
- * From a Process

Q28. An app builder would like to streamline the user experience by reflecting summarized calculations of specific fields on various objects.

Which three field types could be used in roll-up summary fields to accomplish this? (Choose three.)

- * Checkbox
- * Date
- * Percent
- * Time
- * Currency

Q29. An admin is trying to add a custom VF page to the mobile app quick navigation menu but can't. What might be the problem?

- * The VF page references / fields that the user can't access
- * The menu configuration has not been set up correctly for the VF page
- * The smart search is not enabled for the VF page
- * A tab has not been created for the VF page

Q30. Universal Containers uses a custom object to track Projects. When the status of a Project is changed from In Progress; to On Hold;, the business wants the Project owner to be automatically assigned to an On Hold; queue.

What capability can be used to accomplish this?

- * Quick Action
- * Workflow Rule
- * Assignment Rule
- * Escalation Rule

Q31. Which two statements are true about an External ID field? Choose 2 answers

- * The field must contain at least one number and at least one letter.
- * The field can be unique based on case-sensitive or case-insensitive values.
- * The field can be used to contain unique record identifiers from a system outside of Salesforce.

* The field must be unique since duplicates are NOT allowed within Salesforce.

Q32. The VP of Marketing wants to broadcast an email to 10,000 contacts in Salesforce on a regular basis, but realizes Salesforce's mass email functionality has a limitation on the number of emails that can be sent each day.

- * Develop Apex code and Visualforce pages to send the emails.
- * Download all contacts to a CSV file and use an email client to send the mails
- * Research and evaluate products available on AppExchange to send mass emails
- * Request Salesforce increase the number of maximum daily mails.

Explanation: Check out the following link: MassMailer App Link on AppExchange
