Your proyect team decides to use a make-to-order planning strategy for strategic in discrete manufacturing.

What is the impact of this decision?
* Net requirement calcualtion is sales-order specific.

* A sales-order-specific planning run is required.
* Storage location MRP areas are required.
* Production orders specific stock is created

NEW QUESTION 28

The MRP run detected a shortage of a materila that you sorce from an external supplier in full pallets. How can you make sure you will only recive full pallets?
* Use the fixed lot procedure.
* Use the MRP type for vendor managed inventory.
* Use the minimum order quantity
* Use the reorder point

NEW QUESTION 29

You have maintained the parameters for simple discontinuation in the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?
* Production order release
* Material requirements planning
* Backflushing
* Kanban

NEW QUESTION 30

Which of the following processes lead to an entry in the MRP planing file?
* Change of the material’s procurement type
* Creation of purchasing contract
* Creation of dependent requirements
* Creation of sales order
* Change of the storage bin

NEW QUESTION 31

What is the purpose of a reporting point confirmation in repetitive manufacturing?
* To stage different components for a production line simultaneously
* To determine the work in progress along the production line
* To reduce the total production lead time for along production line
* To provide timely updates of inventory management for the staged components

NEW QUESTION 32

When working with bouth cross-plant and plant-specific material statuses n the material master, which statuses has the higest priority?
* The cross-plant status
* The plant-specific status
* The last restrictive status
* The most restrictive status

NEW QUESTION 33

What does it mean for the production planner when MRP works with infinite capacities?
* MRP assigns capacity requirements automatically after the last scheduled order on a work center.
* MRP creates capacity requirements without checking the capacity of a work center.
* MRP assigns capacity requirements automatically to work center is with the earliest available capacity.
* MRP creates capacity requirements only if the work center has sufficient capacity.

NEW QUESTION 34

You want to triggering-house production of a semi-finished mater al before a sales order for the corresponding finished good is received. Which planning strategy supports the consumption of planned independent requirements for the semi-finished material?
* Make-to-order production (20)
* Planning at assembly level (70)
* Planning with final assembly (40)
* Planning without final assembly (50)

NEW QUESTION 35

You set up a material as a phantom assembly by entering the special procurement key in the material master.

How can you switch off the phantom assembly in a specific bill of material (BOM)?
* Change the special procurement key of the phantom assembly in the BOM.
* Change the explosion type of the phantom assembly in the BOM.
* Change the phantom item indicator for the phantom assembly in the BOM.
* Change the item category of the phantom assembly in the BOM.

NEW QUESTION 36

You need to model goods receipt processing time in detailed scheduling. Whic modeling options do you have?
* Model a transportation resorce in the location master.
* Model a seperate resource in the production data structure.
* Model a resource inbound in the location master.
* Model a handling resource in the location master and goods receipt time in the material master.

NEW QUESTION 37

During production order creation, several valid production versions are found. How does the system choose the production version?
* Planned order or material number
* Valid period or sale order
* Alphanumeric or quota arrangement
* Lot size or material cost

NEW QUESTION 38

An issue storage location was NOT found through the work center, bill of material(BOM) item, or material master. What determines whether the storage location can be derived from the production version?
* MRP group
* Plants parameters
* MRP controller
* MRP profile

NEW QUESTION 39

What do you use to dispatch operations from planned orders so that the production plan can be fulfilled?
* Material Requirements Planning (MRP)
* Capacity Requirements Planning (CRP)
* Supply Network Planning (SNP)
* Demand Planning (DP)

NEW QUESTION 40

In your project, you have several materials that are planned by different people. How can you assign the planning responsibility?
* MRP type
* MRP group
* MRP planning file
* MRP controller

NEW QUESTION 41

Your production planners must execute planning only for specific resources. How can you achive this in advanced Planning(PP/DS)
* Use heuristic.
* Use a resource group.
* Use a propagation range.
* Use a planning group.
