NO.16 Which of the following statement is TRUE regarding JMIGMON functions and operation variants?

Please choose the correct answer.

- * JMIGMON is used to start JLOAD processes only
- * JMIGMON cannot start JLOAD processes
- * JPKGCTL will add as many tables to a package until the size limit is reached
- * JMIGMON should not be inspected in case of export or import errors

NO.17 The Jload import of package IMPORT_35_J2EE_CONFIGENTRY failed. When Jload is restarted, which file contains the where condition to delete already loaded data?

- * IMPORT_35_J2EE_CONFIGENTRY.XML
- * IMPORT_35_J2EE_CONFIGENTRY.WHR

- * IMPORT_35_J2EE_CONFIGENTRY.STA
- * IMPORT_35_J2EE_CONFIGENTRY.STATXML

NO.18 You notice that tables were loaded into the wrong database storage unit after a R3LOAD system copy. Which of the following file types must you analyzed?

There are 2 correct answers to this question

- * .TOC
- * .STR
- * .EXT
- * .TPL

NO.19 The JMIGMON network configuration is useful in environments, where file systems can be shared between source and target system. What are these systems? * There are 2 correct answers to this question

- * Edit System
- * Importing System
- * Exporting System
- * Create System

NO.20 Which of the following is not a benefit of SAP OS/DB Migration Check?

Please choose the correct answer.

- * Independent of 3rd party stand-alone solution
- * Efficient Project Implementation through Migration Partners
- * Standardize positions for all migrations
- * Standardize positions for selected migrations
- * Inspection of project schedule by SAP

NO.21 Which tasks does the R3LOAD tool perform? Note: There are 2 correct answers to this question.

- * Write platform-dependent dump files.
- * Compress dump data on block level.
- * Convert cluster tables into transparent tables.
- * Export ABAP Dictionary index definitions.

NO.22 Which of the following programs generate Java Job files to support a parallel export and import?

Please choose the correct answer.

- * JPKGCTL
- * JMIGMON
- * JLOAD
- * JSIZECHECK

NO.23 What can you do with the Software Provisioning Manager?

Please choose the correct answer

- * SAP System uninstall
- * SAP System automated configuration and verification
- * SAP System upgrade
- * SAP Front End installation and distribution

NO.24 Name the two systems associated with the Import JAVA System?

There are 2 correct answers to this question

- * Application System
- * Central System
- * File System
- * Distributed System

NO.25 Which files JPKGCTL create to enable an optimized export of packages?

- * split_input.txt
- * dbsize.xml
- * sizes.xml
- * jsplitter_cmd.properties

NO.26 You are restarting a failed R3LOAD Import. From which file does R3LOAD obtain the WHERE condition to delete data of a table split that had been loaded during the failed import?

- * The task file
- * The Structure file
- * The where file
- * The *.SQL file

NO.27 Which of the following option is not a Technical characteristic of the ABAP Dictionary?

Please choose the correct answer

- * Each table type belong to a certain database storage unit
- * Different table types can be saved in the same database storage unit
- * Tables are generally assign to a table type
- * Large table type cannot be saved by storage unit

NO.28 How do you activate the trace option for the R3SZCHK program?

Please choose the correct answer.

- * Set environment variable R3SZCHK_TL=<1…4>
- * Call R3S2CHK with parameter -TL=<1…4>
- * Call R3S2CHK with parameter -TRACE_LEVEL=<1.. A>
- * Set environment variable R3S2CHK_TRACE_LEVEL=<1 4>

NO.29 List down the Migration Monitor – Net Configuration Variant?

There are 2 correct answers to this question

- * Network: Export directory is shared between source and target system
- * FTP: File transfer via FTP between source and target system EH FTP
- * File transfer via ASP between source and target system
- * Network: Export directory is shared with target system

NO.30 Which files can be generated by R3SZCHK? Choose 2 correct ans.

- * Package split command files
- * Target database size files
- * Initial extent size files
- * Table Partition definition files

NO.31 What information can be found in DDL”.TPL files?

There are 3 correct answers to this question.

- * Truncate SQL template for selectively removing split table data
- * Keyword for exporting data either sorted or unsorted
- * SQL templates for creating tables, Indexes and views
- * List of tables to be created without primary keys or secondary indexes
- * Instruction to create primary keys before or after data load

NO.32 What does JLOAD do with the information from the *.STA files?

Please choose the correct answer

- * It create the import <PACKAGE>.XML files.
- * It imports metadata into a database
- * It finds the restart position after an import error
- * It generates time information for <PACKAGE>.STAT.XML files

NO.33 Which actions does the R3LOAD tool perform?

There are 2 correct answers to this question

- * It identifies if a migration key is required when performing the import.
- * It verifies the syntax of control files during export and import.
- * It executes the Unicode conversion of customer systems during import.
- * It always creates the primary keys before the data load.

NO.34 Which of the following is a JLOAD Export / Import statistics Files?

- * *.STA
- * *.<STAT>.XML
- * *.STAT.XML
- * *.XML

NO.35 What are the special purposes of MIGMON in relation with ABAP Web AS – Target System Tasks > NW 7.0?

There are 2 correct answers to this question

- * Import data from systems
- * Generate R3LOAD command files (*.CMD)for data import
- * Generate R3LOAD task files (*.TSK) for data import (>6.10)
- * Database update statistics

NO.36 In which cases is an R3LOAD task file merge required?

- * If R3LOAD terminates on a database error.
- * If R3LOAD finds an inconsistent table
- * If R3LOAD is manually aborted by an administrator.
- * If R3LOAD discovers a syntax error in a * STR file.

NO.37 Which files can you find in the ABAP <ExportDir>/DB/DBS> directory?

There are 2 correct answers to this question

- * Structure files (*.SIR)

- * Extent files (*.EXT)
- * SQL files (*.SQL)
- * Template files (*.TPL)
