- \* `restrictedType`
- \* `currentUser`
- \* `principal`

- \* argumentType

#### QUESTION 40

What should you pay attention to when connecting two widgets?

- \* The output socket's type does not have to be the same as the input socket's type.
- \* The input socket's type should be the same as the output socket's type.
- \* The output socket's type must be the same as the input socket type.
- \* The input socket's type must be a sub type of a composed item type.

#### QUESTION 41

When are consignments created for an order in the default order management implementation?

- \* When an administrator approves the order
- \* After the order is placed, but before it is sourced successfully
- \* When the user adds items to the cart
- \* After the order is placed and after it has been sourced successfully

#### QUESTION 42

In an Accelerator-based storefront, which of the following would allow you to display a custom CMS Component? Note: There are 2 correct answer to this question.

- \* Create a JSP named [componentTypeCode].jsp that pulls data from a [ComponentTypeCode]Data object.
- \* Configure a custom controller bean and redefine the DefaultCMSComponentController alias to point to it.
- \* Configure a renderer in the cmsComponentRendererRegistry that doesn't need to use a data object or a view.
- \* Create a controller for this component and register it in the cmsComponentControllerRegistry.

#### QUESTION 43

You are implementing two new independent extensions, extension A and extension B, both of which extend and overwrite a bean of the core platform. How can you make sure the bean from extension A doesn't override the one from extension B? Note:

There are 2 correct answer to this question.

- \* Use the beans' parent attribute in extension B to specify the core bean.
- \* Add only one of the extensions into localextensions.xml at the same time.
- \* The beans are loaded in alphabetical order; therefore, extension B takes precedence.
- \* Define a dependency wherein extension B requires extension A.

#### QUESTION 44

What are AddOns specifically designed to allow an SAP Commerce developer to do? Note: There are 2 correct answer to this question.

- \* Extend the Accelerator storefront.
- \* Extend the Backoffice.
- \* Provide additional RESTful web services for OCC.
