[Jul 15, 2023] C-S4CFI-2302 PDF Questions and Testing Engine With 135 Questions
Updated Exam Engine for C-S4CFI-2302 Exam Free Demo & 365 Day Updates

SAP C_S4CFI_2302 certification exam is intended for professionals with experience in finance and accounting who are interested in working with the SAP S/4HANA Cloud platform. C-S4CFI-2302 exam is ideal for professionals who want to demonstrate their expertise in the field and validate their knowledge of SAP S/4HANA Cloud Finance. By passing this certification exam, candidates can enhance their professional credentials, increase their marketability, and demonstrate their commitment to professional development.

SAP C_S4CFI_2302 exam is an excellent opportunity for professionals to validate their skills and knowledge in using SAP S/4HANA Cloud public edition for Finance. By obtaining this certification, professionals can demonstrate their proficiency in SAP S/4HANA Cloud Finance, which can lead to new career opportunities in this field. With proper preparation and dedication, candidates can successfully pass the SAP C_S4CFI_2302 exam and earn their SAP Application Associate certification.

**Q25.** Which data is entered in the asset migration file for each asset master record?
* Cumulative acquisition values in group currency
* Cumulative acquisition values in all currencies
* Accumulated depreciation values in group currency
* Accumulated depreciation values in company code currency

**Q26.** You are configuring cash operations.

To which object do you assign the cash management flow types?
* Liquidity items
* Bank account types
* Planning levels
* General ledger accounts
You assign the cash management flow types to liquidity items when you configure cash operations. Liquidity items are categories that classify cash flows based on their sources and uses. Cash management flow types are attributes that define the nature and direction of cash flows for different transactions. Reference:
https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html

**Q27.** What tasks can you perform from the Display Technical Users app? Note: There are 2 correct answers to this question
* Change the username and password of a print user.
* Assign and unassign users to user groups.
* Lock and unlock the initial user account that is delivered with the new system.
* Upload a certificate for a communication user.

**Q28.** In the template-based migration approach, what is the maximum file size? Note: There are 2 correct answers to this question
* 160 MB per ZIP file
* 100 MB per ZIP file
* 100 MB per XML file
* 160 MB per XML file
In the template-based migration approach, the maximum file size is:

160 MB per ZIP file

100 MB per XML file These are the limits for uploading files to the SAP S/4HANA Migration Cockpit using templates. There is no limit for ZIP or XML files per se, but only for the upload process. Reference:
https://help.sap.com/viewer/product/SAP_S4HANA_MIGRATION_COCKPIT/latest/en-US

**Q29.** Which of the following security measures is the customer responsible for?
* Application-level user management
* Change logging through audit trails
* Deactivation of SAP administrative users
* API management

**Q30.** Two partners agree on a financial transaction with a repayment at the end of the contract with no interest payments made during the term. Which financial transaction is used?
* Bilateral facility
* Deposit at notice
* Cash flow transaction
* Commercial paper

**Q31.** You are creating users in SAP S/4HANA Cloud

For which purpose do you use the business catalogs?
* To provide users access to the apps. relevant for their business functions
* To configure the authorization objects for which the user is responsible
* To create or change passwords for users per business role
* To add, change or delete new process steps within the scope item

You use the business catalogs to provide users access to the apps relevant for their business functions. Business catalogs are collections of apps that are grouped by business roles or scenarios. You assign business catalogs to business roles to grant users access to the apps they need to perform their tasks. Reference:
https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/7e30637d0a0545f99f6a65242a44940d.html

**Q32.** In the template-based migration approach, what is the maximum file size? Note: There are 2 correct answers to this question
* 160 MB per ZIP file
* 100 MB per ZIP file
* 100 MB per XML file
* 160 MB per XML file

**Q33.** Which substitution types can you configure for journal entry substitution rules? (Choose three.)
* Substitute with field value
* Substitute with formula value
* Clear field value
* Substitute with previous value
* Substitute with constant value

**Q34.** What are maintenance functions of the financial statement version (FSV) with the &#8220;Manage GlobalHierarchies&#8221; app? (Choose two.)
* Create G/L account master data
* Assign semantic objects
* Assign profit centers
* Create draft hierarchy versions

The maintenance functions of the financial statement version (FSV) with the &#8220;Manage Global Hierarchies&#8221; app are:

Assign profit centers

Create draft hierarchy versions You cannot use this app to create G/L account master data, assign semantic objects, or add new nodes to the FSV hierarchy. Reference:
https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/7e30637d0a0545f99f6a65242a44940d.html

**Q35.** What activities are applied to the entire system and cannot be changed after confirmation? Note: There are 2 correct answers to this question
* Group currency
* Fiscal year variant
* Scoping
* Configuration activities

**Q36.** What is the purpose of the Test Automation Tool?
* Performs actions in a simulated user interface on behalf of the assigned test user.
* Provides information on your actual tenant configuration.
* Provides information on the business app(s) to be used for testing

* Populates business data for each testscreen.

The purpose of the Test Automation Tool is to perform actions in a simulated user interface on behalf of the assigned test user. The Test Automation Tool is a tool that allows you to execute predefined or custom test scripts for business process testing in your system. The Test Automation Tool does not provide information on your actual tenant configuration, the business app(s) to be used for testing, or populate business data for each test screen. You need to use other tools or apps for those tasks. Reference: https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD/latest/en-US

**Q37.** A customer needs detailed customization to the standard forms and email templates.

What solution should the consultant propose?
* Use the corresponding configuration items to modify elements of the form template
* Create a custom UI with the Custom Fields and Logic app
* Use the Output Management apps to customize a standard template
* Use the Adobe Lifecycle Designer tool to edit a standard template

If a customer needs detailed customization to the standard forms and email templates, you should propose to use the Output Management apps to customize a standard template. You can use these apps to modify elements of the form template, such as layout, content, logo, font, etc.

**Q38.** Which tool do you use to run the SAP Cloud Integration Automation Service for SAP S/4HANA Cloud?
* SAP Activate Roadmap
* SAP Maintenance Planner
* SAP Solution Manager
* SAP Best Practices Explorer

**Q39.** Which tool is used for the liquidity planning in SAP S/4HANA Cloud?
* SAP BPC Optimized for SAP S/4HANA
* SAP Integrated Business Planning
* SAP Analytics Cloud
* SAP Liquidity Planner

**Q40.** In which implementation phase do you perform data load preparation?
* Prepare
* Realize
* Explore
* Deploy

Data load preparation is performed in the Realize phase of the implementation project. This phase involves preparing and validating the data migration objects and performing data consistency checks. Reference: https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/9d1d6e0c6f4740a09ed5d3c3981b8f1d.html

**Q41.** Which feature is available with a resubmission in Collections & Dispute Management?
* It documents the details of a customer&#8217;s pledge to pay an invoice
* It provides a specific reason why a customer needs to be contacted again
* It initiates the dispute resolution process for one or several invoices
* It transfers the dispute case to the collections worklist

A resubmission in Collections & Dispute Management is a feature that provides a specific reason why a customer needs to be contacted again. A resubmission allows you to schedule a follow-up activity for a customer contact and specify the resubmission reason and date. Reference: https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/f7a9d7c86f4740a09ed5d3c3981b8f1d.html

**Q42.** What are some services SAP delivers as part of the RISE with SAP S/4HANA Cloud solution? Note: There are 2 correct

answers to this question.
* Release upgrade planning
* Business process configuration
* Technical upgrade installation
* Infrastructure management
Some services that SAP delivers as part of RISE withSAP S/4HANACloud solution are:

Release upgrade planning

Business process configuration

RISE withSAP S / 4 HANACloudis an offering that provides customers with everything they need to transform their business withSAP S / 4 HANACloud , such as subscription licenses , implementation services , cloud infrastructure , embedded analytics , etc

**Q43.** What determines the set of data migration objects available from the Migrate Your Data application?
* The selected source system
* The customer legacy system
* The selected target fields
* The selected business scenarios
The set of data migration objects available from the Migrate Your Data application depends on the selected business scenarios that are scoped for the implementation project. The source system, the customer legacy system, and the target fields do not determine the data migration objects. Reference:
https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/bf3d6e0c6f4740a09ed5d3c3981b8f1d.html

**Q44.** Why do you perform realignment in Profitability Analysis (CO-PA)?
* To adjust assigned characteristics
* To correct posted general ledger accounts
* To correct exchange rate valuation
* To adjust derived values fields
Realignment in Profitability Analysis (CO-PA) is used to adjust assigned characteristics, such as customer group or product hierarchy, based on changes in master data or derivation rules. Realignment does not affect general ledger accounts, exchange rate valuation, or derived value fields. Reference:
https://help.sap.com/viewer/65de2977205c403bbc107264b8eccf4b/Cloud/en-US/9e9a7e16afef4cc0ad2ab27af385aa72.html

**Q45.** Which feature is available with a resubmission in Collections & Dispute Management?
* It documents the details of a customer&#8217;s pledge to pay an invoice
* It provides a specific reason why a customer needs to be contacted again
* It initiates the dispute resolution process for one or several invoices
* It transfers the dispute case to the collections worklist

**Q46.** In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.
* Modify building blocks
* Add new sales organizations.
* Create new scope items.
* Change approval thresholds
* Add blocking reasons for billing.

**Q47.** What can a business user do with personal settings? Note: There are 2 correct answers to this question.
* Merge two or more columns into a single column.

* Change the format of dates and numbers.
* Change the order of columns in a table.
* Modify the UI layout of the app.

**Q48.** You are implementing the Treasury Trading via Trading Platforms functionality.

Which actions can you perform with the Manage Trade Requests App on the SAP Cloud Platform? Note:

There are 2 correct answers to this question.
* Select transaction rate
* Block requests
* Create hedge requests
* Split request
You can perform the following actions with the Manage Trade Requests app on the SAP Cloud Platform:

Select transaction rate

Block requests You cannot use this app to create hedge requests or split requests. You need to use other apps such as Hedge Management Cockpit or Hedge Request Overview for those actions. Reference: https://help.sap.com/viewer/product/SAP_S4HANA_CLOUD_FOR_TREASURY_MANAGEMENT/latest/en-US
