[2023 Easy To Download CAD Actual Exam Dumps Resources [Q41-Q62

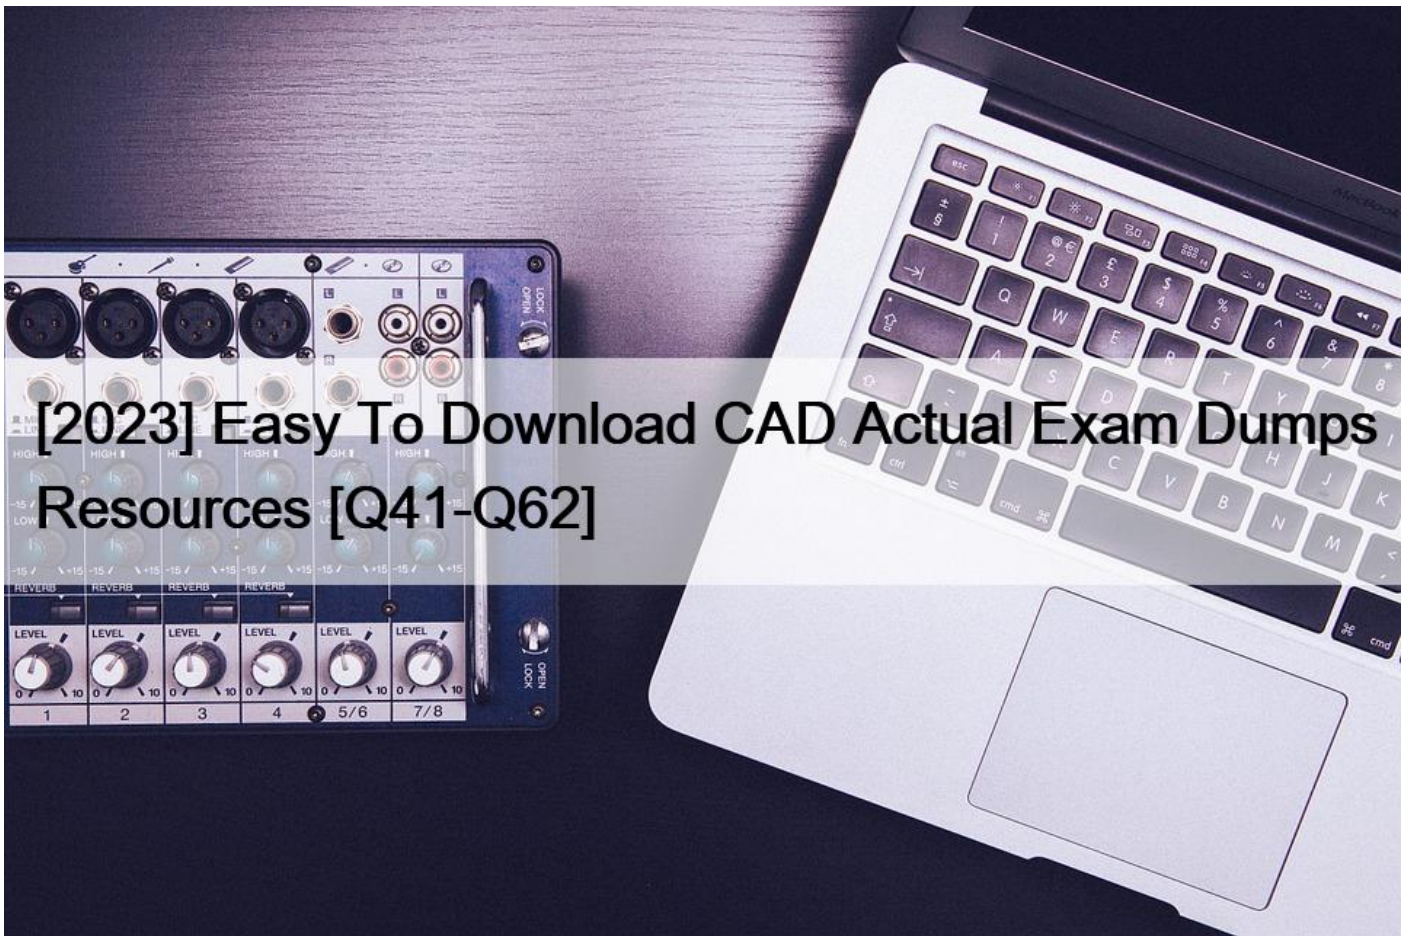

[2023] Easy To Download CAD Actual Exam Dumps Resources
Uplift Your CAD Exam Marks With The Help of CAD Dumps

To take the ServiceNow CAD Exam, candidates must have a basic understanding of ServiceNow development and application design. They must also have experience working with ServiceNow tools and technologies. Candidates who pass the exam will receive the ServiceNow Certified Application Developer (CAD) certification. Certified Application Developer-ServiceNow certification is recognized by employers and can help individuals advance their careers in the ServiceNow development field.

Q41. When creating an application through the Guided Application Creator, which of the following is a user experience option?
* Portal
* Mobile
* Self-service
* Workspace
https://docs.servicenow.com/bundle/tokyo-application-development/page/build/guided-app-creator/concept/guided-app-creator.html

Q42. Client-side scripts manage what?

* Forms and Forms Fields
* Playbook access
* Database and backend
* User access
https://docs.servicenow.com/bundle/tokyo-application-development/page/script/server-scripting/concept/c_ServerScripting.html

Q43. Which of the following is NOT a trigger type in Flow Designer?
* Outbound Email
* Application
* Record
* Schedule

Q44. Which of the following statements is true for the Form Designer?

a)To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form.

b)To create a new field on a form’s table, drag the appropriate data type from the Field Types tab to the form and then configure the new field.

c)To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button.

d)To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.
* a, b, c, and d
* b, c, and d
* a, b, and d
* a, b, and c

Q45. Which one of the following is true regarding Application Scope?
* All applications are automatically part of the Global scope
* Applications downloaded from 3rd party ServiceNow application developers cannot have naming conflicts
* Any developer can edit any application
* Developers can choose the prefix for a scope’s namespace
Explanation

Reference https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/ concept/c_ApplicationScope.html#r_ExampleNamespaceIdentifiers

Q46. When configuring a REST Message, the Endpoint is:
* The commands to the REST script to stop execution
* The URI of the data to be accessed, queried, or modified
* Information about the format of the returned data
* The response from the provider indicating there is no data to send back
Explanation/Reference: https://docs.servicenow.com/bundle/orlando-application-development/page/integrate/outbound-rest/reference/r_RESTMessageElements.html

Q47. Which one of the following is the baseline behavior of a table in a privately-scoped application?
* The table and its data are not accessible using web services
* Any Business Rule can read, write, delete, and update from the table
* Only artifacts in the table’s application can read from the table
* All application scopes can read from the table

https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_DefaultDesignAccessPermissions.html

Q48. Which of the following methods prints a message on a blue background to the top of the current form by default?
* g_form.addInfoMsg()
* g_form.addInfoMessage()
* g_form.showFieldMessage()
* g_form.showFieldMsg()
Explanation/Reference: https://docs.servicenow.com/bundle/orlando-application-development/page/script/useful-scripts/reference/r_DisplayFieldMessages.html

Q49. When a ServiceNow instance requests information from a web service, ServiceNow is the web service:
* Publisher
* Specialist
* Provider
* Consumer
Explanation/Reference: https://docs.servicenow.com/bundle/orlando-application-development/page/integrate/web-services/reference/r_AvailableWebServices.html

Q50. In a Business Rule, which one of the following returns true if the currently logged in user has the admin role?
* g_form.hasRoleExactly(‘admin’)
* gs.hasRole(‘admin’)
* g_form.hasRole(‘admin’)
* gs.hasRoleExactly(‘admin’)
Business Rule is server-side, so it uses GlideSystem API. gs.hasRoleExactly doesn’t exist

Q51. Which of the following methods are useful in Access Control scripts?
* g_user.hasRole() and current.isNewRecord()
* gs.hasRole() and current.isNewRecord()
* g_user.hasRole() and current.isNew()
* gs.hasRole() and current.isNew()
Explanation/Reference: http://servicenowmypath.blogspot.com/2017/

Q52. Which roles grant access to source control repository operations such as importing applications from source control, or linking an application to source control? (Choose two.)
* source_control
* source_control_admin
* admin
* git_admin
Explanation/Reference: https://docs.servicenow.com/bundle/orlando-application-development/page/build/applications/task/t_LinkAnApplicationToSourceControl.html

Q53. Modules must have a Link type. Which one of the following is a list of Link types?
* List of Records, Separator, Catalog Type, Roles
* Assessment, List of Records, Separator, Timeline Page
* List of Records, Content Page, Order, URL (from arguments:)
* Assessment, List of Records, Content Page, Roles
Explanation

Explanation/Reference: https://docs.servicenow.com/bundle/geneva-servicenow-platform/page/administer/

navigation_and_ui/reference/r_ModuleLinkTypes.html

Q54. How must Application Access be configured to prevent all other private application scopes from creating configuration records on an application’s data tables?
* You must create Access Controls to prevent all other application scopes from creating configuration records on an application’s data tables rather than using Application Access
* Set the Accessible from field value to All application scopes and de-select the Can create option
* Set the Accessible from field value to This application scope only and de-select the Allow access to this table via web services option
* Set the Accessible from field value to This application scope only

Q55. How can an application link to a repository behind a firewall?
* This option is not supported.
* Link an application to source control through a MID Server.
* Link an application to source control through an access token.
* Link an application to source control with multi-factor authentication.
“Use an existing MID Server to connect to a Source Control repository. Linking or importing an application through a MID Server enables access to repositories behind a firewall.”
https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/c_SourceControlIntegration.html

Q56. When configuring the content of an Email Notification, which syntax should be used to reference the properties of an event triggering the Notification?
* ${event.<property name>}
* ${current.<property name>}
* ${property name>.getDisplayValue()}
* ${gs.<property name>}
Explanation/Reference: https://community.servicenow.com/community?

id=community_question&sys_id=e017cbe5db1cdbc01dcaf3231f9619a3

Q57. Which one of the following is true for a table with the “Allow configuration” Application Access option selected?
* Only the in scope application’s scripts can create Business Rules for the table
* Any user with the application’s user role can modify the application’s scripts
* Out of scope applications can create Business Rules for the table
* Out of scope applications can add new tables to the scoped application

Q58. Which one of the following is true for a Script Include with a Protection Policy value of Protected?
* Any user with the protected_edit role can see and edit the Script Include
* The Protection policy option can only be enabled by a user with the admin role
* The Protection Policy is applied only if the glide.app.apply_protection system property value is true
* The Protection Policy is applied only if the application is downloaded from the ServiceNow App Store
https://docs.servicenow.com/bundle/rome-application-development/page/build/applications/concept/c_ScriptProtectionPolicy.html

Q59. Modules must have a Link type. Which one of the following is a list of Link types?
* List of Records, Separator, Catalog Type, Roles
* Assessment, List of Records, Separator, Timeline Page
* List of Records, Content Page, Order, URL (from arguments:)
* Assessment, List of Records, Content Page, Roles

Q60. Which of the following objects does a Display Business Rule NOT have access to?

* previous
* GlideSystem
* g_scratchpad
* current

Explanation/Reference: https://community.servicenow.com/community?

id=community_question&sys_id=8af90f29db5cdbc01dcaf3231f96197c

Q61. What records are used to track cross-scope applications or scripts that request access to an application, application resource, or event?

* Restricted caller access records
* Caller tracking records
* Access control level records
* Cross-scope access records

“Restricted caller access [sys_restricted_caller_access] records track cross-scope applications or scripts that request access to an application, application resource, or event in the Now Platform.” <<== this is the third sentence down in the following link:

https://docs.servicenow.com/bundle/tokyo-application-development/page/build/applications/concept/restricted-caller-access-privilege.html

Q62. Which of the following are configured in an Email Notification?

a) Who will receive the notification.

b) What content will be in the notification.

c) When to send the notification.

d) How to send the notification.

* a, b and c
* a, b, and d
* b, c and d
* a, c and d

https://docs.servicenow.com/bundle/tokyo-servicenow-platform/page/administer/notification/task/t_CreateANotification.html
