[Sep-2023] The SAP C-TBW50H-75 Exam Test For Brief Preparation [Q33-Q53]

[Sep-2023] The SAP C-TBW50H-75 Exam Test For Brief Preparation
Revolutionary Guide To Exam SAP Dumps

NO.33 Requested-based deletion would solve which the following problems?

- * Deleting the last load of bad data.
- * Deleting data for a specific company code and division combination.
- * Deleting the request from both the change log and the active table if the request was already activated, but not in the follow-on target.
- * A targeted deletion of change log data.

NO.34 As part of currency translation, a quantity conversion type can be dened to convert the quantity of a currency into the new currency. Determine whether this statement is true or false.

- * True
- * False

NO.35 Before you can use a DB connect data flow in SAP Business warehouse (SAP BW), which of the following tasks must you perform?

- * There are 3 correct answers to this question.

- * Load the RDBMS meta base into a table in SAP BW that the data source can access.
- * Create a Data source on database tables and views with technical names in lowercase letters.
- * Install an SAP-specific Database shared library on the SAP BW application server.
- * Create a Data source on database tables and views with technical names in uppercase letters Install a date base-specific client for the source RDBMS on the SAP BW application server.

NO.36 By using a MultiProvider on top of each InfoCube to control query access, you significantly reduce the effort required, for example, to copy queries after remodeling takes place. Determine Whether this statement is true or false.

- * True
- * False

NO.37 A Conceptual description of data objects, their attributes, and the relationships between them is :

- * A data model
- * An InfoCatalog
- * An InfoSet
- * An InfoSource

NO.38 Your customer requires a query with a formula variables in which objects can you use a formula variable?

There are 2 correct answers to this question.

- * Formulas in a transformation
- * Threshold value in conditions
- * Restricted key figures
- * Calculated key figures

NO.39 A reference InfoObject is a `‘template’` of an InfoObject that is then used as a reference or other objects when the characteristic properties are the same. Determine Whether this statement is true or false.

- * True
- * False

NO.40 A business content Datasource does NOT provide all required fields. What activity does SAP recommend you perform to enrich the extraction? Please choose the correct answer.

- * Expose the Data source as operational data provider and use th ertmation component of SAP Landscape Transformation.
- * Define an append structure, add it to the extract structure and write a function exit to call the relevent information.
- * Create an additional generic Data source to extract the missing nformeg nd combine the data in SAP business warehouse.
- * Neglect the business content data source and define a new generic Data our OE a function module.

NO.41 Which object type performs the delta merge check automatically? Please choose the correct answer.

- * Persistent staging Area
- * SAP HANA optimized info cube
- * Write-optimized Datastore object
- * Standard info cube

NO.42 Which of the following statements describe the advantages of CompositeProviders over the classic MultiProviders/InfoSets?

- * CompositeProviders provide joins and unions with a single object.
- * CompositeProviders can also include joins to classic MultiProviders.
- * CompositeProviders integrate with all the BW InfoProviders.
- * A CompositeProvider can be consumed by another CompositeProvider.
- * Classic MultiProviders have to be recreated as CompositeProviders.

NO.43 In the SAP BW data model, master data is stored separately in attribute, text and hierarchy tables that are linked together using surrogate ID (SID). Determine Whether this statement is true or false.

- * True
- * False

NO.44 Storing raw data in PSA data packages is recommended when the data will update multiple data targets or when the amount of data being extracted is large. Determine whether this statement is true or false.

- * True
- * False

NO.45 You entire data model for SP easiness warehouse (SAP BW) Project consists of SAP BW data models and SAP HANA data models. How can you attain SAP HANA views directly from the SAP BW project? Please choose the correct answer.

- * Use the link with editor function.
- * Drag SAP HANA views to the SAP BW repository tree.
- * Attach the SAP HANA system to the SAP BW project.
- * Use the External SAP HANA view option.

NO.46 The result of a calculation: Si Business Warehouse is incorrect, but the formula is correct. What options do you have to correct the calculation? There are 3 correct answers to this question.

- * Set an exception aggregation to change the calculation behavior
- * Create the formula again to receive a new time stamp.
- * Change the formula collision property to use result of concurrent formula
- * Change the formula collision property to use result of this formula.
- * Create a new structure to receive a new time stamp.

NO.47 Open ODS Views enable you to define SAP BW data models for objects like database tables, database views or BW DataSources (for direct access). Determine Whether this statement is true or false.

- * True
- * False

NO.48 Non-cumulative key gures are values calculated according to a particular period of time and the value is then incremented or decremented based on an inow or outow. Determine whether this statement is true or false.

- * True
- * False

NO.49 In an SAP Business warehouse query, you have two structures with intersecting with interacting formulas. What is the default behavior when you run the query? Please choose the correct answer.

- * The formula contained in the structure that was saved first is used.
- * The formula contained in the structure that was saved last is used
- * The formula contained in the structure in the rows is Used
- * Both formulas are ignored and the cell shows an error

NO.50 Besides Datasource objects and advanced Datastore objects, which other objects are required to create a transaction data flow for loading an advanced Datastore objects? Please choose the correct answer.

- * Data transfer process.transformation
- * Info source.Data flow objects
- * Infopackage.transformation
- * Data flow objects.transformation.

NO.51 You need to transport a generic data sources from the SAP development | is to the SAP Test landscape, what sequence of

activities does SAP recommend? Please choose the correct answer.

- * Transport the active SAP Business warehouse data source in SAP Business warehouse.
- * Transport the active SAP Business warehouse Data source in SAP Business warehouse.
- * Transport the SAP ERP data source. Transport the active SAP Business warehouse Data source in SAP Business warehouse.
- * Transport the SAP ERP data source. Replicate the data source in SAP Business warehouse.
- * Transport the SAP ERP data source. Replicate the data source in SAP Business warehouse. Transport the active SAP Business warehouse Data source.

NO.52 Which of the following statements regarding internal and external hierarchies are true? Choose the correct answers.

- * Internal hierarchies have no link to master data tables
- * Internal hierarchies are used to display characteristics without using an external hierarchy
- * External hierarchies are defined in Business Explorer Query Designer on the hierarchy tab
- * External hierarchies are defined as external because the data is stored outside of BW on the OLAP server
- * External hierarchies are stored in BW master data tables

NO.53 In the SAP Business Warehouse Query Designer in the SAP HANA studio, what can you define using the cell editor? Please choose the correct answer.

- * Additional filters/restrictions that apply to a complete column or row of the result set
- * Formulas and selections for cells to override the cell values
- * Cell references that can pass their results to variables processed with a replacement path
- * Help cells that serve as containers for help selections or formulas to display in the query
