Pass Your Huawei Exam with H19-371_V1.0-ENU Exam Dumps

Candidates who successfully pass the Huawei H19-371_V1.0-ENU certification exam will be considered experts in the field of digital power and will be highly sought after by employers in this industry. HCS-Pre-sales-Digital Power V1.0 certification is a valuable asset for those who are looking to advance their career within the digital power industry, as it demonstrates a deep understanding of the industry and the technologies that are currently available.

Huawei H19-371_V1.0-ENU (HCS-Pre-sales-Digital Power V1.0) Exam is a certification exam that is designed to test the skills and knowledge of candidates who want to become certified professionals in the field of digital power. H19-371_V1.0-ENU exam is intended for pre-sales engineers, sales engineers, and technical support engineers who are involved in the pre-sales and sales of digital power products and solutions. H19-371_V1.0-ENU exam covers various topics such as digital power products and solutions, digital power market trends and demands, digital power industry standards and policies, and digital power system design and implementation.

Q210. What kind of cable entry and exit methods can be realized by the FusionModule2000 integrated power distribution cabinet?

- * Top-in and online-exit
- * Top-in and bottom-out lines
- * Down in and out on the line
- * Down in and out of the line

Q211. The Huawei Configurator can automatically configure the cable specifications and lengths from the head cabinet to the IT cabinet. ().

- * True
- * False

Q212. With an IT load of 537.80kW, an 80kVA UPS system can meet the basic needs.

- * True
- * False

Q213. Huawei Precision Air Conditioner supports 1 indoor unit corresponding to multiple outdoor units (true or false).

- * True
- * False

Q214. The bypass module of UPS5000-E-200K (50kVA power module) is the same as the bypass module of UPS5000-E-300K

- * True
- * False

Q215. What are the ways of piping in FusionModule800? ()

- * Compatible with up and down pipes
- * Down the tube
- * Up the tube

Q216. FusionModule1000A V2R3 version supports custom VESDA system

- * True
- * False

Q217. The NetEco6000 management system can provide the temperature cloud map function to realize the identification of cold and hot spots in the computer room.

How many layers does the temperature cloud map support?

- * Single layer
- * Double layer
- * Three floors
- * Fourth floor

Q218. Eaton and UPS5000-A 30kVA~ 120kVA similar models are ()

- * 9395
- * NXR
- * 9390.

Q219. UPS5000-E (50kVA module) series UPS does not derate backup power, the number of 12V batteries in the following configuration, () is unreasonable. /

- * Section 34
- * Section 38

* Section 40

* Section 36

Q220. UPS can be placed outside Fusionmodule2000 ()

* True

* False

Q221. In a project, the customer wants to show the operation and maintenance of the data center to the external visiting customers.

At this time, can the () function of the NetEco management system be used to achieve this?

* Alarm management

* Energy Efficiency Management

* Large screen display

* Report Management

Q222. UPS5000-series modular UPS product features are similar to which of the following product models? ()

* Hipulse-u

* 80-NET

* NXr

* APM

Q223. The characteristics of the compressor used by Huawei NetCol5000-A include: (multiple choice)

* The highest volumetric efficiency, low noise and low vibration

* No reciprocating motion, few moving parts, high reliability

* International famous brand, long life, high reliability

* Safe operation under 3000V voltage

Q224. What are the i3 features of FusionModule2000 V3.0 version? ()

* iPower

* iCooling

* iManager

Q225. The wrong description about the reliability of NetCol5000-C row-level air conditioner is:

* It adopts dual power supply, and the two power supply adopts automatic switching mode

* Operators, large data centers such as large corporate headquarters prefer this type of air conditioner, and small and medium-sized enterprises are more likely to use NetCol5000-A air conditioners

* Multi-fan air supply: online maintenance is possible

* Cannot be used in scenarios without raised floor, because condensate drainage cannot be connected to the pipe

Q226. UPS2000-G 6~20kVA maximum support () parallel, good scalability.

* 0

* 2

* 3

* 4

Q227. FusionModule1000A V2R3 version 20-foot CT solution is equipped with 4 600*800*2200mm CT cabinets

* True

* False
