QUESTION 42

Which of the following considerations apply to the concept of categorization work in SAP Commerce?

Note: There are 2 correct answers to this question.
* A category is a logical group of products with the same attributes.
* A category can contain a set of product attributes.
* A product can belong to multiple categories.
* A category can have multiple parent categories.

QUESTION 43

What are the differences between boost rules and promoting items? Note: There are 2 correct Answer to this question
* Boost rules are defined globally while promoted items are category aware.
* Promoting an item prioritizes it more than the boost rules do

* Boost rules are attribute-focused while promoted items are product-focused.
* Boosting an item prioritizes it more than promoting an item does

QUESTION 44

Which of the following is a recommended use case for product variants?
* The product manager picks valid values for the voltage attribute inherited by products in the Household Appliances category
* The product manager defines a localized product variation for each country-specific website.
* The customer picks from a selection of fabrics when adding a jacket to the cart
* The customer picks a size for each of the four drives in a disk array.
Product variants are used to provide customers with the ability to customize products with different attributes, such as size, color, fabric, etc. This allows customers to choose the exact product that suits their needs. For example, in the case of a jacket, the customer may be able to choose from a selection of fabrics.

QUESTION 45
