

New ValidExam C-BW4H-211 Exam Questions Real C-BW4H-211 Dumps Updated on Nov 06, 2023 [Q40-Q57]

New ValidExam C-BW4H-211 Exam Questions| Real C-BW4H-211 Dumps Updated on Nov 06, 2023
C-BW4H-211 Braindumps – C-BW4H-211 Questions to Get Better Grades

SAP C-BW4H-211 certification exam is designed for professionals who are involved in the implementation and maintenance of SAP BW/4HANA solutions. It focuses on the skills required to create and manage data models, design and execute data flows, and build reports and dashboards using SAP BW/4HANA. SAP Certified Application Associate - Reporting, Modeling and Data Acquisition with SAP BW/4HANA certification validates the candidate's knowledge and expertise in reporting, modeling, and data acquisition with SAP BW/4HANA.

To prepare for the SAP C-BW4H-211 exam, candidates can take advantage of SAP's official training courses, which cover topics such as data modeling, data acquisition, and report creation. They can also use third-party study materials, such as practice exams and study guides, to supplement their learning.

Q40. Which source types are available to create a generic DataSource in SAP ERP? Note: There are 3 correct answers to this

question.

- * ABAP class method
- * Database view
- * SAP query
- * ABAP function module
- * HDI Calculation View

Q41. You want to build an SAP HANA HDI calculation view of data category CUBE, but you get the "no measure defined" error. For the business requirement, a measure does not make sense. Besides changing the data category to DIMENSION, what do you have to do?

- * Switch from an aggregation node to a star join node
- * Switch from an aggregation node to a projection node
- * Switch from a projection node to an aggregation node
- * Switch from a projection node to a star join node

Q42. You are following a top-down method for your SAP BW/4HANA modeling project. What would be your first task?

- * Check available sources in the SAP ERP system
- * Collect reporting requirements
- * Determine if physical or logical objects will be needed
- * Determine enhancements of SAP Business Content

Q43. For test purposes, you want to combine an existing SAP BW/4HANA Data Model with virtual data from a new non-SAP source system. Which approach should you consider for rapid prototyping?

- * Field-based modeling
- * InfoObject based modeling
- * Business content activation
- * Generate Data Flow

Q44. SAP provides three data warehouse solutions to provide customers more flexibility. How is SAP Data Warehouse Cloud positioned?

- * To empower business users to generate SQL code that is pushed to SAP BW/4HANA
- * To empower business users to create and maintain process chain from SAP BW/4HANA dataflows
- * To support business user who want to simplify their own ABAP routines
- * To support business user with a new self-service tool to model their own data flows

Q45. For a report, you would like to highlight the deviation from predefined threshold values for a key figure. Which BW query feature do you use?

- * Reference cell
- * Exception
- * Condition
- * Key figure property

Q46. Using SAP HANA as modeling focus, you want to combine data from different sources. Which techniques can you use? Note: There are 2 correct answers to this question.

- * BAPIs (Business Application Programming Interface)
- * Calculation views
- * AMDPs (ABAP Managed Database Procedures)
- * Stored procedures

Q47. Which SAP solutions can leverage the Write Interface for DataStore objects (advanced) to push data into the inbound table of

DataStore objects (Advanced)?

There are 2 correct answers to this question.

- * SAP Data Services
- * SAP Landscape Transformation Replication Server
- * SAP Process Integration
- * SAP Data Warehouse Cloud.
- * A. SAP Data Services: This tool can leverage the Write Interface for DataStore objects (advanced) to push data into the inbound table of DataStore objects (advanced) using RFC or HTTP calls. This can improve the performance and flexibility of data integration scenarios12.
- * B. SAP Landscape Transformation Replication Server: This tool can leverage the Write Interface for DataStore objects (advanced) to push data into the inbound table of DataStore objects (advanced) using RFC or HTTP calls. This can improve the performance and flexibility of data replication scenarios13.

Q48. You have created a custom characteristic with the technical name `“COSTOBJ”`. Depending on the controlling area, you need to have different attribute values assigned. How do you design the model?

- * Compound the characteristic for Controlling Area with the characteristic `“COSTOBJ”`.
- * Define characteristic `“COSTOBJ”` as a navigation attribute for Controlling Area.
- * Compound characteristic `“COSTOBJ”` with the characteristic for Controlling Area.
- * Define Controlling Area as a navigation attribute for the characteristic `“COSTOBJ”`.

Q49. You use a measure with semantic type `“Amount with Currency Code”` in your SAP HANA HDI calculation view. Which kind of currency reference can be assigned to the measure? Note: There are 2 correct answers to this question.

- * A column from another SAP HANA view
- * Another column of the same SAP HANA view
- * A variable in the same SAP HANA view
- * A fixed currency from table TCURC

Q50. You want to run a BW query, but you only have partial authorization for the data selection. What happens related to the BW query in this scenario?

- * The BW query does not start running.
- * The BW query starts and the unauthorized values are 0.
- * The BW query starts and shows an error message.
- * The BW query starts and only the authorized data is displayed.

Q51. You want to define a restricted column in an SAP HANA HDI calculation view. What do you need to define? Note: There are 2 correct answers to this question.

- * A reference to an existing measure
- * A condition criterion
- * An SAP HANA data type
- * An aggregation method

Q52. What are the prerequisites for deleting master data (for example, cost centers) in SAP BW/4HANA? Note: There are 2 correct answers to this question.

- * There must be no BW analysis authorizations defined that use any of the cost centers
- * There must be no transaction data referring to the cost centers
- * There must be no hierarchy for the cost centers
- * There must be no BW query that uses cost center as a free characteristic.

Q53. What are some of the prerequisites for using SAP S/4HANA ABAP CDS views for extraction into SAP BW/4HANA in an ODP context? Note: There are 2 correct answers to this question.

- * An ODP source system with context ODP_CDS must be created in SAP BW/4HANA
- * The ABAP CDS views must be defined with the appropriate data extraction annotations
- * THE ABAP CDS views must be released via program RODPS_OS_EXPOSE for BW extraction
- * An Operational Data Provisioning Framework must be configured in SAP BW/4HANA

Q54. What are the possible ways to fill a pre-calculated value set (bucket)? Note: There are 3 correct answers to this question.

- * By referencing a table
- * By using a query (update value set by query)
- * By entering the values manually
- * By accessing an SAP HANA HDI Calculation View of data category Dimension
- * By using a transformation and data transfer process (DTP)

Q55. What foundation is necessary to use SAP S/4HANA embedded analytics?

- * Generated external SAP HANA Calculation Views
- * SAP Agile Data Preparation
- * SAP HANA optimized business content
- * ABAP CDS view based virtual data model

Q56. What are the reasons for implementing CompositeProviders? Note: There are 2 correct answers to this question.

- * To provide a virtual data mart layer that combines existing BW models
- * To persist combined data for reporting
- * To directly expose an external SAP HANA table for reporting
- * To provide an interface for BW queries

Q57. In which ODP context is the operational delta queue (ODQ) managed by the target system?

- * ODP_BW
- * ODP_CDS
- * ODP_SAP
- * ODPJHANA
