

Free VMCE2021 Exam Braindumps - New 2023 Veeam Practice Exam [Q105-Q121]

Free VMCE2021 Exam Braindumps - New 2023 Veeam Practice Exam
Practice Test for VMCE2021 Certification Real 2023 Mock Exam

The VMCE 2021 certification is recognized worldwide as a mark of excellence in Veeam software proficiency. It is highly valued by employers and can lead to career advancement and increased earning potential. In addition to enhancing technical skills and knowledge, the certification also demonstrates an individual's commitment to continuous learning and professional development.

NEW QUESTION 105

A planned failover of three VMs has just completed successfully, starting the VMs at the disaster recovery location. What next actions are available for the failover plan?

- * Undo, Start, Copy, Delete
- * Cancel, Start, Edit, Delete
- * Cancel, Start, Copy, Delete
- * Undo, Start, Edit, Delete

https://helpcenter.veeam.com/archive/backup/110/vsphere/failover_plan_undo.html According to the Veeam Backup & Replication user guide¹, a failover plan is a set of rules that defines how VMs must be failed over to their replicas¹. You can create and run failover plans for regular replicas and CDP replicas¹.

After you run a failover plan, you can perform the following actions on it²:

Undo – reverts VMs in the failover plan back to their original state at the production site².

Start – runs the failover plan again if you need to repeat the failover operation for some reason².

Edit – modifies the settings of the failover plan, such as adding or removing VMs, changing their order or time delay¹.

Delete – removes the failover plan from Veeam Backup & Replication. This does not affect the VM replicas that are used by the plan¹.

NEW QUESTION 106

A backup administrator needs to restore two data drives to a VM where the operating system remains intact.

The target machine must remain powered on. What recovery option is most appropriate to perform this operation?

- * Instant VM Recovery
- * Instant disk recovery
- * Restore entire VM
- * Restore VM files

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/instant_disk_recovery.html?ver=100

NEW QUESTION 107

Which of the following Veeam Backup & Replication jobs can be set up to support GFS retention?

(Choose two.)

- * Backup Copy
- * Backup
- * Backup to tape
- * Replication
- * Configuration Backup

NEW QUESTION 108

Offloading backup files to the capacity tier of a scale out repository can be done automatically by leveraging what type of job?

- * Archive Job
- * Offload Job
- * Backup Copy Job
- * Backup Job

NEW QUESTION 109

Which backup method is described below? “After a full VM backup is created, subsequent backups are incremental. Only

data blocks that have changed since the last job run are backed up. All the changes are injected into the created .vbk file to rebuild it to the most recent state of a VM. (Select two.)

- * Forever forward incremental backup
- * Reverse incremental backup
- * Forward incremental backup with synthetic fulls with transform to rollbacks
- * Forward incremental backup

NEW QUESTION 110

A backup job has been configured to keep three incremental restore points and a synthetic full backup each Sunday. More restore points are present on disk than what was configured in the job. Why?

- * The old restore points will be deleted after the new restore chain meets the retention policy
- * Per VM backup files are enabled in the repository
- * The other restore points are weekly full backups, this is expected
- * You should configure the synthetic full backup to be performed on Mondays instead

Explanation

https://helpcenter.veeam.com/docs/backup/vsphere/synthetic_full_hiw.html?ver=100

NEW QUESTION 111

If your mount server is running Windows Server 2019 and you are performing a secure restore, which statement below is true?

- * NTFS is the only format supported.
- * RefS will be skipped.
- * RefS will be processed and scanned.
- * Storage Spaces disks will be processed and scanned.

NEW QUESTION 112

Which of the following objectives is achieved by adding additional proxy servers, in conjunction with parallel processing? (Choose two.)

- * Avoiding creation of VMware snapshots.
- * Distributing backup processing across multiple proxy servers
- * Decreasing backup duration
- * Setting the I/O latency limit for production storages
- * Decreasing backup size

NEW QUESTION 113

You want to deploy an On-Demand Sandbox. While creating the application group, which sources can be used to add virtual machines to the Application Group? (Choose three.)

- * Backup Copy in Backup repository
- * Replica on non-Cloud Connect VMware vSphere host
- * Replica on Cloud Connect VMware vSphere host
- * Backup in Cloud Repository
- * Storage Snapshot
- * Backup on Backup Repository

NEW QUESTION 114

A Backup Administrator needs to create a fully functional VM at a secondary location in an isolated network, and the VM should not require manual editing or modifications to the configuration. Which of the following jobs could the Backup Administrator use? (Choose two.)

- * Backup Job
- * VM Copy Job
- * Replication Job
- * SureBackup Job
- * Configuration Backup Job

NEW QUESTION 115

Which of the following is used in order to avoid unwanted changes to VM replicas when performing verification or recovery?

- * .vlb file
- * Virtual Lab Manager
- * VM snapshot
- * .ctk file

https://helpcenter.veeam.com/docs/backup/vsphere/surereplica_hiw.html?ver=110

NEW QUESTION 116

What would be the primary benefit of replication from backup files compared to a regular replication process?

- * Higher speed of transfer over the WAN link
- * Lower RTO
- * Lower RPO
- * Lower impact on production storage

<https://www.veeam.com/backup-version-standard-enterprise-editions-comparison.html>

NEW QUESTION 117

Which recovery verification tests can be executed when verifying both backups and replicas? Choose three options.

- * Heartbeat test
- * Ping test
- * Application test
- * Memory test
- * Operating System test
- * CRC check

NEW QUESTION 118

Which of the following is a backup mode that can be configured within a Veeam Agent for Windows backup job?

- * Reverse incremental with periodic active full backups
- * Forward incremental and reverse incremental, both with optional periodic synthetic and/or active full backups
- * Forward incremental with optional periodic synthetic and/or active full backups
- * Reverse incremental with optional periodic synthetic full backups

https://helpcenter.veeam.com/docs/backup/hyperv/forward_incremental_backup.html?ver=

NEW QUESTION 119

When performing SureBackup recovery verification, Veeam Backup & Replication powers VMs from the Application Group according to what order?

- * No order. VMs are started in parallel
- * The order of priority as specified in the Application Group settings
- * The order as they appear in the schedule
- * The order specified in the Virtual Lab settings

NEW QUESTION 120

Can Universal Application-Item Recovery (U-AIR) be performed in the absence of a Virtual Lab for a VMware vSphere environment?

- * No, deploy a virtual lab ?vPower NFS is not utilized
- * No, deploy a virtual lab ?vPower NFS must be configured
- * Yes, a Virtual Lab is not required for Enterprise Plus edition
- * Yes, if the proper infrastructure is configured regardless of license edition

NEW QUESTION 121

Veeam Backup & Replication establishes the stabilization point during SureBackup verification according to which of the following algorithms? (Choose three.)

- * Stabilization by heartbeat
- * Stabilization by maximum allowed boot time
- * Stabilization by resource allocation
- * Stabilization by application group
- * Stabilization by IP
- * Stabilization by application test

https://helpcenter.veeam.com/docs/backup/hyperv/surebackup_job_processing.html?ver=95

Veeam VMCE2021 (VMCE 2021) Exam is a certification exam designed for IT professionals who specialize in data backup, recovery, and management. VMCE2021 exam is administered by Veeam, a leading provider of backup, recovery, and data management solutions for virtual, physical, and cloud-based workloads. The VMCE2021 exam is the latest version of the VMCE certification and is designed to test the knowledge and skills of IT professionals who work with Veeam Availability Suite, a comprehensive solution that provides backup, replication, and recovery for virtualized environments.
