- * Collaboration and communication
- * Monitoring and alerting

QUESTION 19

What is a function of the discovery operation during the service operation phase of the cloud service lifecycle?

- * Collects information about people involved in the service operations
- * Collects information about services available in the catalog
- * Provides visibility into each Cloud service asset employed
- * Restores service levels while continuously optimizing operations

QUESTION 20

What is a characteristic of storage resource pools?

- * Resource pools should always be created by different types of storage devices
- * Resources are reserved by the application after being released by the consumer
- * Resources are dynamically released to the pool when the consumer exceeds their quota
- * Resources are dynamically allocated based on consumer demand

QUESTION 21

What term refers Amount of time and effort required to exploit an attack vector

- * Attack Surface
- * Work factor
- * Velocity of attacker
- * Attack Vector

QUESTION 22

The incident management team is unable to determine the root cause of an incident.

To which team should the error-correction activity be transferred?

- * Performance Management
- * Change Management
- * Availability Management
- * Problem Management

QUESTION 23

What are the benefits of modern applications compared to traditional applications?

- * Designed to run independently and use a linear, continuous approach in development, build, test, and deploy
- * Distributed system architecture, designed to run independently, and use multiple programming languages
- * Single programming language and framework and scale by growing vertically
- * Monolithic, built with interdependent modules, and use distributed system architecture

QUESTION 24

To implement a new service desk management tool, the capacity of the servers has to be extended.

Who is responsible for managing the request for additional capacity?

- * Change Manager
- * Financial Manager

- * Capacity Manager
- * Service Level Manager

QUESTION 25

What is the correct order of the business continuity plan principles?

Options

- Analyze
- Measure
- Execute
- Design
- Identify

Answer area

premium.validexam.com

Navigation icons: right arrow, left arrow, up arrow, down arrow

Options

- Analyze
- Measure
- Execute
- Design
- Identify

Answer area

premium.validexam.com

Identify

Analyze

Design

Measure

Execute

Navigation icons: up arrow, down arrow

Explanation

Identify

Analyze

Design

Measure

Execute.

QUESTION 26

- * Identification
- * Mitigation
- * Assessment
- * Monitoring

QUESTION 29

Which concept ensures accountability for security breaches or misuse of resources?

- * Compliance
- * Governance
- * Risk management

QUESTION 30

What is a benefit of synchronous remote replication?

- * Saves network bandwidth by replicating only deduplicated data
- * Replicates data across any geographic location without impacting response time
- * Ensures that source and replica always have identical data
- * Supports repeated write I/O to the same location to improve replication performance

QUESTION 31

DRAG DROP

Match each key functions of service operation management with its objective.

<u>Function</u>	<u>Objective</u>
Problem management	Maintain information on components and their relationships that needs to be managed to deliver services
Incident management	Restore cloud services to normal operational state as quickly as possible when unplanned events cause an interruption or downgrade to service quality
Information security management	Prevent incidents that share common symptoms and root causes from reoccurring, and minimize adverse impact of incidents that cannot be prevented
Service asset and configuration management	Prevent occurrence of incidents or activities adversely affecting the confidentiality, integrity, and availability of information in cloud services and service management processes

Function	Objective
Problem management	Service asset and configuration management
Incident management	Incident management
Information security management	Problem management
Service asset and configuration management	Information security management
