# VCP-AM 2021 2V0-71.21 Practice Test Engine Try These 55 Exam Questions [Q30-Q48

VCP-AM 2021 2V0-71.21 Practice Test Engine: Try These 55 Exam Questions
Guaranteed Success in VCP-AM 2021 2V0-71.21 Exam Dumps

Q30. Which storage provider is available in Tanzu Mission Control for Data Protection?
* Local Storage
* AWS
* Google
* Any S3 compatible Storage

Q31. Which prerequisite must be configured before starting the Tanzu workload management enablement wizard?
* Content library
* Tanzu Mission Control
* Storage policy
* Tanzu Build Service

Q32. What is the default authentication implemented in Tanzu Kubernetes Grid?
* Keycloak

* Vault
* Dex & Gangway
* kube-oidc-proxy

Q33. After successfully configuring vSphere Container Storage Interface (CSI), what is the path an administrator can follow to view the status of the container volumes?
* Describe the StorafeClass via kubectl.
* vSAN Data Store in ESXi Host Client.
* Get the status of the pods vis kubectl.
* Container volumes in vSphere Client.
https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.storage.doc/images/GUID-FE79A934-E0B5-4A92-890A-5FDDCA77E199-low.png

Q34. Which option provides a configuration blueprint to deploy Tanzu Kubernetes clusters?
* Tanzu Kubernetes Cluster Spec
* Tanzu Kubernetes Grid Installer
* Tanzu ClusterAPI Provider
* Tanzu Kubernetes Cluster Plan
Reference:

A cluster plan is a blueprint that describes the configuration with which to deploy a Tanzu Kubernetes cluster. It provides a set of configurable values that describe settings like the number of control plane machines, worker machines, VM types, and so on.

Q35. A customer needs to use Kubernetes and wants to use networking solution, Antrea.

Which product from Tanzu portfolio should the customer use?
* Tanzu Application Catalog
* Tanzu Kubernetes Grid
* Tanzu Mission Control
* Tanzu Observability

Q36. What is the MINIMUM required version of vSphere to install Tanzu Kubernetes Grid?
* 6.0 Update 1
* 6.5 Update 2
* 6.7 Update 1
* 6.7 Update 3

Q37. Which upgrade method can be used for an ‘in-place’ Kubernetes update?
* Run “kubectl patch” command against a Tanzu Kubernetes cluster
* Change the VirtualMachineClass on a Tanzu Kubernetes cluster
* Change the number of control plane nodes
* Change the StorageClass on a Tanzu Kubernetes cluster

Q38. What is the object in Kubernetes used to grant permissions to a cluster wide resource?
* ClusterRoleAccess
* RoleBinding
* ClusterRoleBinding
* RoleReference

Q39. What Kubernetes feature would be used to force the scheduler to place instances of the application on different nodes?

* nodeAffinity/nodeAntiAffinity
* nodeAuthorization
* kubectl
* namespaces

Q40. Which two options are supported use of Content Library in VMware vSphere with Tanzu? (Choose two.)
* Subscribed Content Library requires internet connectivity
* Local Content Library for Air-Gapped Deployment
* Subscribed Content Library for Air-Gapped Deployment
* Download manually via Content Library
* Local Content Library requires internet connectivity

Q41. Choose two supported functionalities when enabling Workload Management with a VMware vSphere Distributed Switch? (Choose two.)
* NSX Advanced Load Balancer
* NSX Load Balancer
* Tanzu Kubernetes clusters
* Embedded Harbor Registry
* vSphere Pods
You can check a table “Choose and Configure the Networking Stack” in this resource:
https://docs.vmware.com/en/VMware-vSphere/7.0/vmware-vsphere-with-tanzu/GUID-EE236215-DA4D-4579-8BEB-A693D1882C77.html

Q42. What are two ClusterAPI providers being used in Tanzu Kubernetes Grid? (Choose two.)
* CAPZ
* CAPA
* CAP
* CAPW
* CAPV

Q43. Which log file can be used for troubleshooting when there is a problem with Workload Control Plane (WCP) deployment?
* wcpsvc.log
* websso.log
* vpxd.log
* sps.log

Q44. Which step must be taken to enable Kubernetes auditing on a Tanzu Kubernetes cluster?
* Set the ENABLE_AUDIT_LOGGING variable to ‘true’ before deploying the cluster
* Run systemctl start auditd && systemctl enable auditd on master node
* Audit is enabled by default on every Tanzu cluster
* Edit /etc/kubernetes/audit-policy.yaml and set ENABLE_AUDIT variable to ‘1’ on master node
Reference:

%20auditing%20on,on%20the%20control%20plane%20node

Q45. Which prerequisite must be configured before starting the Tanzu workload management enablement wizard?
* Content library
* Tanzu Mission Control
* Storage policy
* Tanzu Build Service

A storage policy is required to enable the Workload Management. A content library is only needed when deploying TKC clusters https://docs.vmware.com/en/VMware-vSphere/7.0/vmware-vsphere-with-tanzu/GUID-EE236215-DA4D-4579-8BEB-A693D1882C77.html

Q46. What are the pre-requisites for installing the Harbor registry in Tanzu Kubernetes Grid (TKG)?

* Install Harbor helm from vCenter.
* Deploy a management cluster, download and install the TKG extensions and Carvel tools.
* Deploy a management cluster, launch the Harbor installation wizard.
* Deploy a management cluster and install Tanzu Kubernetes Grid extensions.

Q47. What us the definition of Tanzu Kubernetes Grid Instance?

* Management cluster and Tanzu Kubernetes clusters
* Management cluster and Tanzu Operations
* Management cluster and Tanzu Build Service
* Management cluster and kubeadm

Q48. What is the command to find out the available node base operating system images?

* kubectl get nodes
* kubectl cluster-info
* kubectl get virtualmachineclasses
* kubectl get virtualmachineimages
