

## Updated Aug 12, 2024 Test Engine to Practice Test for C\_IBP\_2311 Valid and Updated Dumps [Q47-Q70]

Updated Aug 12, 2024 Test Engine to Practice Test for C\_IBP\_2311 Valid and Updated Dumps  
Exam Questions for C\_IBP\_2311 Updated Versions With Test Engine

### SAP C\_IBP\_2311 Exam Syllabus Topics:

TopicDetailsTopic 1- Solution Architecture & Data Integration- Configure and use Planning Operators to automate processes in your planning modelTopic 2- General Configuration of a Planning Area- Optimize inventory in the supply chain utilizing algorithms that derive inventory targetsTopic 3- Describe how IBP extends the logic of S&OP in the network using advanced demand- Display, create, copy, edit, check, and activate a planning area

**NO.47** What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct answers to this question

- \* Substitute missing values in case of sporadic demands.
- \* Choose time-independent key figures as segmentation measures
- \* Identify inventory items that require closer attention
- \* Use forecasting algorithms that are specific to seasonal demands of SKUs in the segment

**NO.48** You set up time-series integration using SAP Cloud Integration for data services. During the integration process of master data, an error occurred. In the Data Integration app the job failed with the status **Fatal Error**; How can you find more details about the error?

- \* Navigate to the Master Data Workbook in Excel and open the Log.
- \* Navigate to the Manage Master Data app and open the Log
- \* Download the initial Problem report in the Data Integration app
- \* Download the Rejection Report in the Data Integration app

**NO.49** The Planner Workspaces is an important User Interface of SAP IBP for Supply Chain. What are the value drivers to use this as a planner? Note: There are 3 correct answers to this question

- \* Issues can be identified and solved with special functions
- \* It combines various components into one user interface
- \* It can trigger SAP S/4HANA transactions in real time.
- \* It combine the data from multiple planning area into one user interface
- \* Application job can be started from this user interface

**NO.50** You are setting up planning with lot sizes. What are some of the properties of lot sizes that you need to beware of? Note: There are 2 correct answers to this question

- \* Lot sizes are applicable for production and handling quantities.
- \* Periodic lot size setting overrides the minimum lot size.
- \* Lot size are time-independent master data settings
- \* Lot size are applicable for production and transportation quantities

**NO.51** You are implementing SAP IBP for sales and operations and are researching forecast mode algorithms. What are some of the algorithms that can be used? Note: There are 2 correct answers to this question

- \* Data-cleansing algorithms
- \* Trend models algorithms
- \* Sporadic demand models algorithms
- \* Naive models algorithms

**NO.52** You have set up a planning area, and data is now available. You adjust the necessary time profile settings and run a consistency check Which settings can you change and still run a successful consistency check? Note: There are 2 correct answers to this question

- \* Add a new time profile level to the time profile
- \* Change the numbering hierarchy of the period IDS in the time profile.
- \* Change the past and future horizon of the level in the time profile
- \* Change the description of attribute in the time profile

**NO.53** Which of the following conditions are relevant for subtotals in the planning view? Note: There are 2 correct answers to this question.

- \* The total value can be added before or after the selected attribute
- \* The Total number of the attribute that can use subtotal in the planning view can be restricted
- \* The values of the attribute-based total at the highest attribute level in the planning level can be changed
- \* Only attribute-based totals can be added to the planning view.

**NO.54** You need to integrate data from SAP S/4HANA and legacy ERP to SAP IBP. What are the integration tools that you can use with such a setup for data transfer? Note: There are 2 correct answers to this question.

- \* SAP Cloud Integration for data services
- \* SAP Smart data Integration
- \* Core Interface

- \* Real-time Integration

**NO.55** As an architect, you are configuring the Planner Workspaces user interface settings. Which appearance settings are on your to-do list? Note: There are 3 correct answers to this question

- \* Adding planning view
- \* Add Navigation profile
- \* Define key figure formatting
- \* Add custom alerts
- \* Add playbooks for alerts

**NO.56** What option is available for the key figure that is enabled for fixing?

- \* Fixing is possible for key figures with negative values
- \* Fixing is possible for a part of key figure value on a certain planning level
- \* You can change a fixed key figure only with administrative rights
- \* Fixing is possible for certain period, Including all child values in the hierarchy

**NO.57** Which of the following key functions are supported by SAP IBP for sales and operations? Note: There are 2 correct answers to this question

- \* Allocation planning
- \* Simple statistical forecast
- \* Multi-Level Supply Planning Heuristics
- \* SAP Product Lifecycle Management

**NO.58** You are evaluating criteria for choosing the solver to support planning for a complex supply What are some of the points that should be reviewed? Note: There are 2 correct answers to this question.

- \* Finite heuristics works with demand prioritization
- \* Push and Pull production models are used by the optimizer
- \* Prioritization of demand elements one by one is achieved by unconstrained heuristics
- \* Planning results can be generated faster by the optimizer.

**NO.59** How many different time levels can be selected within one planning view?

- \* Only time levels from the base planning level of selected key figures
- \* All time levels available in the time profile, restricted by global configuration parameter
- \* All time levels available in the time profile
- \* The number of time levels is restricted to four to avoid negative effects on performance

**NO.60** You are configuring disaggregation for the KF 1 key figure in the Planning Areas Model Configuration app. Which methods can you use? Note: There are 3 correct answers to this question

- \* Disaggregation according to user-defined expression
- \* Disaggregation according to an equal split
- \* Disaggregation in batch triggered by an application job
- \* Disaggregation according to a helper key figure
- \* Proportional disaggregation by using KF2 in the expression

**NO.61** What are some of the features of the network charts in SAP Integrated Business Planning for Supply Chain? Note: There are 2 correct answers to this question

- \* To display the network chart, you need the Ship-From Location master data type in the planning area
- \* You can create a network chart from the dedicated app, or use the Analytic Advanced app
- \* You can create a network chart from the dedicated app, or use the Manage Analytic Stories app
- \* The network charts visualize relationships between warehouse, plants, customer, and supplier, for finished goods

**NO.62** Which unified planning processes' data is commonly reviewed in SAP IBP for sales and operations? Note: There are 2 correct answers to this question.

- \* Global Demand Plan
- \* Constrained Demand plan
- \* Inventory Plan
- \* Consensus Demand Plan

**NO.63** Manage Analytics Stories introduces advanced visualization features within SAP Integrated Business Planning for Supply Chain. What are some of the main capabilities of the stories? Note: There are 3 correct answers to this question.

- \* Links to the external URLs can be embedded in the story.
- \* The story is structured around one responsive page
- \* Specific chart and table filters can be applied within the story
- \* Stories must be re-created in each SAP IBP environment.

**NO.64** Which sourcing methods are required to identify the product flow through the network? Note:

There are 3 correct answers to this question.

- \* Sourcing via Production
- \* Sourcing via Demand Prioritization
- \* Unspecified Sourcing
- \* Customer sourcing Rule
- \* Sourcing via Costs

**NO.65** What are the relevant use cases for helper key figures? Note: There are 2 correct answers to this questions.

- \* Used to break down a large calculation into manageable subcalculations
- \* Used by end-users in planning views to help visualize cross-period calculations
- \* Used at any level of calculation level except the Request Level
- \* Used when you have more than three inputs at the different planning level in one calculation

**NO.66** The S&OP Operator Profiles app is used to configure different types of algorithms. Which algorithm- specific settings are unique for the Time Series-based Supply Optimizer? Note: There are 2 correct answers to this question.

- \* Discretization
- \* Time profile level
- \* Global cost factors
- \* Processing mode

**NO.67** You created a key figure and want to add calculations. Which of the following rules do you consider?

Note: There are 2 correct answers to this question

- \* All key figure calculation have calculation inputs, which can be marked as stored or calculated
- \* The calculation chain for a key figure must always result in a calculated key figure
- \* Aggregation calculations using SUM or MAX functions must be based on a higher aggregation level.
- \* Key figure can be calculated across the different planning levels

**NO.68** Which apps can be enhanced with analytical charts? Note: There are 2 correct answers to this question.

- \* Web-based Planning
- \* Intelligent visibility
- \* Planner Workspace
- \* Dashboards Advanced

**NO.69** Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- \* Purge Master Data
- \* Purge Key Figure Data Outside Planning Area Planning Horizon
- \* Purge Key Figure Data
- \* Purge Non-Confirming Data

**NO.70** Which processes are embedded in the sample planning areas SAP6 and SAP3?

- \* SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning
- \* SAP6 Demand Planning and Sensing, and SAP3 Control Tower
- \* SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning
- \* SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning
