to this question.
* Correct data directly without special authorization
* View a message summary based on the interface
* Change the name of a field
* Change the color of a message status
* Navigate from an error message to the associated SAP transaction code

**QUESTION 45**

When do you activate the replication of WBS elements for Central Finance?
* After the mapping replication of cost centers
* After replication is activated in SAP System Landscape Transformation (SLT)
* After the initial load of FI documents
* After the configuration of inbound outbound ALE
Detailed Explanation: The replication of WBS elements in Central Finance is activated after the configuration of inbound and outbound ALE to ensure that all necessary communication interfaces are in place.

**QUESTION 46**

Your customer has completed the initial load of FI/CO postings in a test landscape. Before starting the next test cycle, what must you do to reset the initial load?

Note: There are 3 correct answers to this question.
* Stop the data extraction in the target system.
* Run the RFINS_CFIN_CLEAR_INIT_LOAD report in the target system.
* Delete all entries in the CFIN_SOURCE_SET table in the source system.
* Delete or cancel all SAP Application Interface Framework (AIF) messages with status errors.
* Run the RCFIN_DEL_MIG report in the source system.
Detailed Explanation: To reset the initial load before starting the next test cycle, you must run the
RFINS_CFIN_CLEAR_INIT_LOAD report in the target system, delete or cancel SAP AIF messages with status errors, and run the
RCFIN_DEL_MIG report in the source system to clean up previous data

**QUESTION 47**

Which delta data categories are replicated in real time from SLT to the Central Finance system?

Note: There are 2 correct answers to this question.
* Add
* Delete
* Exclude
* Reconcile
Detailed Explanation: SAP S/4HANA Central Finance uses SLT to replicate financial data in real time. The two key delta data categories that are transferred in real time include Add (newly created records in the source system) and Delete (records removed or deleted). These real-time updates ensure that the Central Finance system reflects all critical financial transactions happening in the source system without delays.

**QUESTION 48**

Which service or application does Master Data Governance (MDG) provide to maintain key mappings one by one?
* Web Dynpro application

* Central Finance replication
* Cost object mapping
* SAP GUI transaction

Detailed Explanation: The Web Dynpro application provided by Master Data Governance (MDG) is the standard interface for maintaining key mappings one by one, allowing users to manually manage individual mappings.
