

Free 700-841 Exam Study Guide for the NEW [Apr-2025 Dumps Test Engine [Q143-Q160]

Free 700-841 Exam Study Guide for the NEW [Apr-2025] Dumps Test Engine [Q143-Q160]

Free 700-841 Exam Study Guide for the NEW [Apr-2025 Dumps Test Engine 700-841 PDF Dumps Extremely Quick Way Of Preparation

Cisco 700-841 exam is an essential certification for professionals who want to enhance their skills and knowledge in IoT technologies. It is a challenging exam that requires a deep understanding of IoT concepts, network connectivity, data management, security, and automation. Passing the exam and earning the certification can open up new career opportunities and provide a competitive advantage in the fast-growing field of IoT.

Cisco 700-841 exam, also known as the Cisco IoT Advantage for Systems Engineers exam, is designed for professionals who want to validate their skills and knowledge in implementing and managing Cisco IoT solutions. 700-841 exam measures candidates' ability to design and deploy IoT solutions using Cisco technologies, including Cisco IoT platforms, wireless technologies, security protocols, and analytics tools. Cisco IoT Advantage for Systems Engineers certification is ideal for systems engineers, network engineers, and solution architects who work with IoT solutions and want to advance their career in this field.

NEW QUESTION 143

In an IoT solution, which Cisco solution can provide enhanced visibility and control over network devices?

- * Cisco Edge Intelligence
- * Cisco Kinetic
- * Cisco IoT Operations Dashboard
- * Cisco DNA Center

NEW QUESTION 144

What is the role of machine learning in IoT application development?

- * Real-time data analysis
- * Security protocols
- * Device configuration
- * Application design

NEW QUESTION 145

What is the main benefit of using Cisco Connected Factory in manufacturing IoT solutions?

- * Real-time asset tracking
- * Predictive maintenance capabilities
- * Enhanced operational efficiency
- * Improved data security

NEW QUESTION 146

What does IoT stand for?

- * Internet of Things
- * Internet of Technology
- * Internet of Thinking
- * Internet of Trade

NEW QUESTION 147

What is the primary purpose of using edge computing in IoT application development?

- * Reduced latency
- * Increased cloud storage
- * Improved network security
- * Enhanced data visualization

NEW QUESTION 148

Which of the following is a security consideration for IoT deployments?

- * Using unsecured Wi-Fi networks
- * Patching vulnerabilities promptly
- * Disabling all security features
- * Ignoring security audits

NEW QUESTION 149

Which Cisco IoT solution is designed to securely connect and manage IoT devices at scale?

- * Cisco Jasper Control Center
- * Cisco IoT Field Network Director
- * Cisco DNA Center
- * Cisco Edge Intelligence

NEW QUESTION 150

Which cellular technology is specifically optimized for IoT applications, offering better coverage, battery life, and cost compared to traditional cellular networks?

- * 4G LTE
- * 5G
- * LTE-M
- * NB-IoT

NEW QUESTION 151

What is the purpose of an IoT gateway in an IoT application architecture?

- * Data storage
- * Data processing
- * Data transmission
- * Data visualization

NEW QUESTION 152

Which of the following is a commonly used protocol for communication between IoT devices and cloud servers?

- * HTTP
- * MQTT
- * FTP
- * TCP

NEW QUESTION 153

What is the advantage of using containerization technology like Docker in IoT application development?

- * Easier deployment and management of applications
- * Improved device security
- * Enhanced communication between devices
- * Better data encryption

NEW QUESTION 154

What is the term used to describe the process of cleansing and preparing IoT data for analysis?

- * Data Collection
- * Data Migration
- * Data Integration
- * Data Wrangling

NEW QUESTION 155

Which Cisco IoT solution is designed for asset tracking and management in transportation and logistics?

- * Cisco Edge Intelligence
- * Cisco Kinetic
- * Cisco Jasper
- * Cisco Connected Fleet

NEW QUESTION 156

Which Cisco IoT solution enables intelligent asset visibility and monitoring?

- * Cisco Jasper Control Center
- * Cisco DNA Center
- * Cisco Edge Intelligence
- * Cisco Kinetic

NEW QUESTION 157

What is a common method used by hackers to gain unauthorized access to IoT devices?

- * Social engineering
- * Physical attacks
- * Secure authentication
- * Encryption

NEW QUESTION 158

Which of the following is NOT a key component of IoT?

- * Sensors
- * Actuators
- * Routers
- * Connectivity

NEW QUESTION 159

Which Cisco IoT solution enables businesses to gather insights from IoT data, perform real-time analytics, and create intelligent applications?

- * Cisco IoT Data Management
- * Cisco IoT Connectivity
- * Cisco IoT Security
- * Cisco IoT Application Development

NEW QUESTION 160

Which Cisco IoT solution helps organizations harness data from connected devices for actionable insights?

- * Cisco Jasper Control Center
- * Cisco Edge Intelligence
- * Cisco DNA Center
- * Cisco Kinetic
